Vulcans Forge:

Antedating Shakespeare's Poems and Plays Penny McCarthy, 2024-09-05 The academic community treats the chronology of Shakespeare's works as settled He supposedly served an apprenticeship collaborating on plays in the 1580s wrote two great poems in the early 90s three plays a year from the mid 90s some problem plays around the turn of the century then his greatest tragedies and finally some romances late in his career This investigation highlights the flaws in the consensus view over reliance on precarious stylometrics dubious identification of topical relevance and unfounded conviction that composition preceded publication performance or first mention by only a short interval Concentrating on his poems and six of his plays the study ascribes parallels in others literary works to their authors imitation or parodying of Shakespeare not vice versa The importance of patronage circles rather than London theatre companies to writers players and printers is spelled out The conclusion is that Shakespeare's works must be radically antedated
