Astrology and Cosmology in Early China David W. Pankenier,2013-10-10 The ancient Chinese were profoundly influenced by the Sun Moon and stars making persistent efforts to mirror astral phenomena in shaping their civilization In this pioneering text David W Pankenier introduces readers to a seriously understudied field illustrating how astronomy shaped the culture of China from the very beginning and how it influenced areas as disparate as art architecture calendrical science myth technology and political and military decision making As elsewhere in the ancient world there was no positive distinction between astronomy and astrology in ancient China and so astrology or more precisely astral omenology is a principal focus of the book Drawing on a broad range of sources including archaeological discoveries classical texts inscriptions and paleography this thought provoking book documents the role of astronomical phenomena in the development of the Celestial Empire from the late Neolithic through the late imperial period
