Humphreys, 1992 Presents current work in various fields computer science neuropsychology cognitive science artificial intelligence relevant to vision research Eight of the eleven articles were previously published in 1990 in a special issue of *Mind and Language* Clear well produced figures and diagrams Annotation copyright by Book News Inc Portland OR

The Roots of Visual Depiction in Art Derek Hodgson, 2019-04-01 Why ancient humans first began to represent animals is a question that has led to a bewildering number of theories since cave art was discovered in the 19th century Drawing on insights from visual science evolution and art theory the book takes the reader on a unique and intriguing journey showing how the development of visual imagery in the human brain throughout evolution eventually led to the first figurative depictions of animals 37 000 years ago

A Reader in Visual Agnosia Glyn Humphreys, Jane Riddoch, 2016-01-13 The case study of John has provided a unique insight into the nature of visual agnosia and more broadly into the underlying processes which support human vision After suffering a stroke John had problems in recognizing common objects faces seeing colours reading and finding his way around his environment *A Reader in Visual Agnosia* brings together the primary scientific papers describing the detailed investigations for each visual problem which the authors carried out with John known as patient HJA This work was summarised initially in *To See But Not To See* 1987 and 26 years later in *A Case Study in Visual Agnosia Revisited* 2013 The chapters are divided into 6 parts corresponding to the key areas of investigation Integrative visual agnosia Perception of global form Face perception Colour perception Word recognition Changes over time Each part contains a short introduction written by the two leading researchers who worked with John which highlights the relations between the papers and demonstrates the pathway of the case analysis The book will be invaluable to students and researchers in visual cognition cognitive neuropsychology and vision neuroscience

Visual Attention and Cognition W.H. Zangemeister, H.S. Stiehl, C. Freksa, 1996-09-23 The goal of this book is to put together some of the main interdisciplinary aspects that play a role in visual attention and cognition The book is aimed at researchers and students with interdisciplinary interest In the first chapter a general discussion of the influential scanpath theory and its implications for human and robot vision is presented Subsequently four characteristic aspects of the general theme are dealt with in topical chapters each of which presents some of the different viewpoints of the various disciplines involved They cover neuropsychology clinical neuroscience modeling and applications Each of the chapters opens with a synopsis tying together the individual contributions
