Teaching With Multiple Intelligence:

Teaching and Learning Through Multiple Intelligences Linda Campbell, Bruce Campbell, Dee Dickinson, 2004 Teaching and Learning Through Multiple Intelligences is an outstanding resource that offers expert analysis of Gardner's Theory of Multiple Intelligences and the knowledge to extend this theory to effective classroom practice. Broad based and comprehensive, this text describes implications for pedagogy, team teaching, student strengths, curriculum, assessment, community involvement, and diverse classroom models. The authors devote one chapter to each of the eight intelligences. They define intelligence, provide a checklist for identifying it, suggest environmental considerations, and offer related teaching strategies. Additional chapters survey Gardner's recent work on teaching for understanding, performance based assessment, and model MI school programs and student outcomes.

Multiple Intelligences in the Elementary Classroom Susan Baum, Julie Viens, Barbara Slatin, *Teaching for Multiple Intelligences* David G. Lazear, 1992 Over the past 50 years, brain researchers have stated that human beings probably use less than 1 percent of the brain's potential, and research findings about human intelligence have transformed almost all previous definitions of intelligence. This booklet addresses the following key findings in intelligence research: intelligence is not fixed or static; intelligence can be learned and taught; and intelligence is a multidimensional phenomenon that occurs at multiple levels of the brain-mind-body system. After this discussion of the research, the publication is divided into five parts: 1. Overview of the Seven Intelligences: verbal-linguistic, logical-mathematical, visual-spatial, body-kinesthetic, musical-rhythmic, interpersonal intelligence, and intrapersonal intelligence. 2. Teaching for Multiple Intelligences: A New Look at the Curriculum includes an exercise on how one can teach for multiple intelligences in one's curriculum. 3. New Instructional Methods for Teaching with Multiple Intelligences. 4. Teaching about Multiple Intelligences: Re-inventing the Learning Process and 5. A Multi-Modal Approach to Assessment includes techniques for student evaluation and teacher self-assessment. Contains 27 references. LL [Seven Ways of Teaching](#) David G. Lazear, 1991 This guide provides a rationale and approach for translating Howard Gardner's theory of multiple intelligences into classroom practice. The introduction explains Gardner's theory, gives the definitions of the seven intelligences, he identifies verbal-linguistic, logical-mathematical, visual-spatial, body-kinesthetic, musical-rhythmic, interpersonal, intrapersonal, and defines specific capacities that are related to these intelligences. The seven chapters present model lessons that emphasize one of the intelligences as the primary mode of knowing and learning. Each of these lessons includes: 1. a lesson plan that helps teachers select the appropriate tools for the intelligence being emphasized; 2. a brief overview of the processes of awakening, amplifying, teaching, and transferring as they apply to the intelligence being emphasized in the lesson; 3. the lesson procedures; 4. suggestions for adapting the lesson to needs different from the proposed grade level; 5. assessment tips; 6. lesson plans designed to help teachers reflect on how a past or future lesson could be restructured to incorporate the intelligence being emphasized in the lesson; and 7. a chart of ideas for lessons in a given

intelligence area The appendices contain helpful examples of lesson procedures and graphic organizers a glossary and 110 references AA
