[Influence and Intertextuality in Literary History](#) Jay Clayton, Eric Rothstein, 1991 This important collection explores and clarifies two of the most contested ideas in literary theory today influence and intertextuality The study of influence tends to center on major authors and canonical works identifying prior documents as sources or contexts for a given author Intertextuality on the other hand is a concept unconcerned with authors as individuals it treats all texts as part of a network of discourse that includes culture history and social practices as well as other literary works In thirteen essays drawing on the entire spectrum of English and American literary history this volume considers the relationship between these two terms their rivalry their kinship their range of uses Debates about these two concepts have been crucial to the new historicism and the resurgence of interest in literary history The essays in this volume employ a refreshing array of examples from that history poetry of the Renaissance and the twentieth century novels of the eighteenth through twentieth centuries Old English texts and postmodernist productions that have served as recurrent intertexts for contemporary theory The contributors treat such currently vital questions as the role of the author canon formation gender causality and the social dimension of texts They illuminate old assumptions and new ideas about agency that lie behind notions of influence and they examine models of an anonymous textual field that lie behind notions of intertextuality The volume takes much of its character from its own intertextual origin as a group project of the English faculty at the University of Wisconsin Madison Though diverse in their academic interests concerns and experience the contributors participated in an ongoing intellectual exchange that is a model of how new scholarship can arise from dialogue

*Postmodern Social Analysis and Criticism* John W. Murphy, 1989-06-15 Although postmodernism has had clear impact on literary criticism the social and political implications of this philosophy have not been systematically investigated

Murphy's study is the first to bring a broad interdisciplinary perspective to the subject and to present postmodernism as a coherent social theory. Responding with compelling arguments to critics of postmodernism, Murphy develops a model that offers a viable alternative to traditional approaches to conceptualizing and studying social life. In an introductory chapter, Murphy looks at the differences between modernism and postmodernism and discusses the metanarratives that characterize the former. He goes on to clarify key assumptions and concepts, especially the postmodern opposition to the traditional Western separation of subject and object. In subsequent chapters, he describes the research methodology used by postmodernists, their views of social ontology, and the relationship between order and structure and the creation of socially responsible institutions. The postmodernists' reconceptualization of key aspects of cultural reality, including time, space, reason, and social relations, is examined in detail. Murphy concludes by exploring the political ramifications of the postmodernist model and its potential as a vehicle for building a genuinely democratic society. This study will be of particular interest to philosophers, economists, and sociologists concerned with contemporary developments in European social philosophy. It is relevant to courses or study in social theory and philosophy, communication theory, cultural criticism, and related fields.
