[The Meaning of Modern Architecture](#) Hans Rudolf Morgenthaler,2016-03-09 Using empathy as established by the Vienna School of Art History complemented by insights on how the mind processes visual stimuli as demonstrated by late 19th century psychologists and art theorists this book puts forward an innovative interpretative method of decoding the forms and spaces of Modern buildings This method was first developed as scholars realized that the new abstract art appearing needed to be analysed differently than the previous figurative works Since architecture experienced a similar development in the 1920s and 30s this book argues that the empathetic method can also be used in architectural interpretation While most existing scholarship tends to focus on formal and functional analysis this book proposes that Modern architecture is too diverse to be reduced to a few common formal or ornamental features Instead by relying on the viewer s innate psycho physiological perceptive abilities sensual and intuitive understandings of composition form and space are emphasized These aspects are

especially significant because Modern Architecture lacks the traditional stylistic signs Including building analyses it shows how by visually reducing cubical forms and spaces to linear configurations the exteriors and interiors of Modern buildings can be interpreted via human perceptive abilities as dynamic movement systems commensurate with the new industrial transportation age This reveals an inner necessity these buildings express about themselves and their culture rather than just an explanation of how they are assembled and how they should be used The case studies highlight the contrasts between buildings designed by different architects rather than concentrating on the few features that relate them to the zeitgeist It analyses the buildings directly as the objects of study not indirectly as designs filtered through a philosophical or theoretical discourse The book demonstrates that with technology and science affecting culture [The Life and Work of Jerzy Soltan](#) Szymon Ruszczewski,2023-12-11 This book is the first comprehensive monograph on Polish modern architect Jerzy So tan s work including his designs theory and teachings in Poland and America based on extensive archival research and oral history interviews with former students The Life and Work of Jerzy So tan takes the reader on a journey to both sides of the iron curtain the communist Poland and the capitalist United States contributing to the existing scholarship on modernism in post socialist countries on CIAM and on Team 10 It pictures So tan as a central player in the history of modernism building on his own contribution and on close relationships with Le Corbusier and Team 10 This book illustrates not only So tan s work but also his life and how it influenced twentieth century architecture Looking in detail at his designs and texts enables the reader to discover how modern architecture tendencies can fit into a larger geopolitical context and how designs can be true manifestos to an architect s theory The reader will be immersed in a series of different contexts from communist Poland the vibrant academic atmosphere at Harvard to lively discussions on the future of modern architecture This publication will be of particular interest for those studying modern architecture in Central Europe and in post socialist countries in particular Poland Architects designers architectural and design students and modern architecture enthusiasts will find this publication on the last modernist architect revealing new perspectives thanks to the unpublished and unresearched sources
