Daniel F McAuley

Time Blocking Planner Trending:

Current Trends in AI Planning Christer Bäckström, Erik Sandewall, 1994 AI planning is a broad research topic linked with such issues as robotics control theory operations research and learning The purpose of EWSP 93 was twofold Planning under certainty or classical search based planning is one direction in the submitted papers with approaches ranging from the introduction of conditional actions to methods based on statistics and decision theory

New Trends in Intelligent Software Methodologies, Tools and Techniques Yutaka Watanobe, Takuya Azumi, 2022-10-15 The integration of applied intelligence with software has been an essential enabler for science and the new economy creating new possibilities for a more reliable flexible and robust society But current software methodologies tools and techniques often fall short of expectations and are not yet sufficiently robust or reliable for a constantly changing and evolving market This book presents the proceedings of SoMeT_22 the 21st International Conference on New Trends in Intelligent Software Methodology Tools and Techniques held from 20-22 September 2022 in Kitakyushu Japan The SoMeT conference provides a platform for the exchange of ideas and experience in the field of software technology with the emphasis on human centric software methodologies end user development techniques and emotional reasoning for optimal performance The 58 papers presented here were each carefully reviewed by 3 or 4 referees for technical soundness relevance originality significance and clarity they were then revised before being selected by the international reviewing committee The papers are arranged in 9 chapters software systems with intelligent design software systems security and techniques formal techniques for system software and quality assessment applied intelligence in software intelligent decision support systems cyber physical systems knowledge science and intelligent computing ontology in data and software and machine learning in systems software The book assembles the work of scholars from the international research community to capture the essence of the new state of the art in software science and its supporting technology and will be of interest to all those working in the field

Priority Planning Zuri Deepwater, AI, 2025-03-04 Feeling overwhelmed by endless to do lists Priority Planning provides a practical guide to mastering prioritization helping you focus on high value activities and eliminate time wasting tasks It delves into effective time management strategic planning and productivity offering a framework to achieve personal and professional goals The book emphasizes aligning your actions with your values and strategic objectives not just managing time and introduces tools like the Eisenhower Matrix for categorizing tasks by urgency and importance Building upon principles like the Pareto Principle the 80/20 rule the book demonstrates how focusing on the vital few tasks yields significant results It progresses logically starting with prioritization concepts then moves to identifying values and goals and finally explores techniques like time blocking Using case studies and practical exercises Priority Planning distinguishes itself by offering a customizable framework that readers can tailor to their unique circumstances making it a valuable resource for anyone seeking greater effectiveness stress reduction and leadership effectiveness

Study Hack Trends Talia

Mercer, AI, 2025-04-07 Study Hack Trends addresses the pressing need for effective study strategies time management and stress reduction in the demanding field of legal education The book investigates trending study hacks used by law students critically analyzing their benefits and potential academic consequences It emphasizes that while techniques like the Pomodoro Technique and active recall may offer immediate advantages understanding their long term psychological impact is crucial for sustainable academic success The book uniquely blends practical self help advice with academic rigor drawing from empirical research and insights from educational psychology It systematically explores memorization techniques time management methodologies and stress reduction strategies assessing each for its benefits and drawbacks For example mindfulness is presented not just as a buzzword but as a tool to combat burnout and imposter syndrome common issues in law school Readers can expect a clear accessible and evidence based approach empowering them to make informed decisions about their study habits The book progresses by first introducing a range of study hacks then dissecting time management systems like the Eisenhower Matrix and finally examining stress reduction techniques This approach provides law students pre law students and academic advisors with the knowledge and tools needed to thrive in a challenging academic environment
