

Writing Systems

**John Robertson Dunlap, Arthur Van
Vlissingen, John Michael Carmody**

Writing Systems:

Writing Systems Florian Coulmas, 2003 During its long history the problem of reducing language to writing and conversely that of interpreting written signs as language has found a variety of solutions which still exist in the form of different writing systems Written by a leading expert this new textbook provides an accessible introduction to the major writing systems of the world from cuneiform to English spelling Florian Coulmas presents detailed descriptions of the world's writing systems and explains their structural complexities as well as the intricate relationship between written and spoken language The book also provides a clear and engaging account of the history of writing and its consequences for human thought and literate society This illustrated textbook includes questions for discussion at the end of each chapter and an up to date explanation of theoretical issues Clearly organised and engagingly written it is the ideal textbook for use on courses on writing systems

Second Language Writing Systems Vivian Cook, Benedetta Bassetti, 2005-01-01 *Second Language Writing Systems* looks at how people learn and use a second language writing system arguing that they are affected by characteristics of the first and second writing systems to a certain extent independently of the languages involved This book for the first time presents the effects of writing systems on second language reading and writing and on second language awareness and provides a new platform for discussing bilingualism biliteracy and writing systems

Writing Systems Henry Rogers, 2005 Accessibly written *Writing Systems A Linguistic Approach* provides detailed coverage of all major writing systems of historical or structural significance with thorough discussion of structure history and social context as well as important theoretical issues The book examines systems as diverse as Chinese Greek and Maya and each writing system is presented in the light of four major aspects of writing history and development internal structure the relationship of writing and language and sociolinguistic factors The volume is extensively illustrated and the glossary of technical terms exercises and further reading suggestions that accompany each chapter make *Writing Systems* a valuable resource for students in linguistics and anthropology

A Computational Theory of Writing Systems Richard William Sproat, 2000-07-03 This book develops a formal computational theory of writing systems It offers specific proposals about the linguistic objects that are represented by orthographic elements what levels of linguistic representation are involved and how they may differ across writing systems and what formal constraints hold of the mapping relation between linguistic and orthographic elements Based on the insights gained Sproat then proposes a taxonomy of writing systems The treatment of theoretical linguistic issues and their computational implementation is complemented with discussion of empirical psycholinguistic work on reading and its relevance for the computational model developed here Throughout the model is illustrated with a number of detailed case studies of writing systems around the world This book will be of interest to students and researchers in a variety of fields including theoretical and computational linguistics the psycholinguistics of reading and writing and speech technology

Advances in the Creation and Revision of Writing Systems Joshua A. Fishman, 2015-09-25 No detailed

description available for [Advances in the Creation and Revision of Writing Systems](#) [Visible Speech](#) John DeFrancis, 1989 Visible Speech is an attempt to set the record straight about the nature of writing John DeFrancis a noted specialist in the Chinese language shows that writing can be based only upon a sound system and not upon any other linguistic level He corrects the erroneous views of Chinese writing as pictographic ideographic logographic or morphemic and defends his conclusion that because of these misrepresentations the nature of all writing continues to be misunderstood Using the writing systems of Sumerian Egyptian Arabic Japanese Korean Greek Mayan and English among others to illustrate his points Dr DeFrancis stresses their basic identity as representatives of visible speech while noting their secondary differences as manifested in their diverse script forms He proposes a new classification of writing systems based on this theme of diversity and oneness and makes an impassioned case for the essential phonetic component of all writing This book reflects the author's sound scholarship and novel insights which place it in the forefront with such classics on writing as those by Gelb Dinger Cohen Frier and Jensen The readable style aims at a general audience interested in understanding the nature of the symbols that first strike the eye while the academic research involved makes it an indispensable work for scholars in the many fields related to language and linguistics [The Blackwell Encyclopedia of Writing Systems](#) Florian Coulmas, 1999-03-12 This is an encyclopedia of writing systems scripts and orthographies of all the world's major languages past and present It provides both a fully illustrated description of over 400 writing systems and an account of the study of writing in many different disciplines from anthropology to psychology [An Atlas of Endangered Alphabets](#) Tim Brookes, 2024-08-29 A global exploration of the many writing systems that are on the verge of vanishing and the stories and cultures they carry with them If something is important we write it down Yet 85% of the world's writing systems are on the verge of vanishing not granted official status not taught in schools discouraged and dismissed When a culture is forced to abandon its traditional script everything it has written for hundreds of years sacred texts poems personal correspondence legal documents the collective experience wisdom and identity of a people is lost This Atlas is about those writing systems and the people who are trying to save them From the ancient holy alphabets of the Middle East now used only by tiny sects to newly created African alphabets designed to keep cultural traditions alive in the twenty first century from a Sudanese script based on the ownership marks traditionally branded into camels to a secret system used in one corner of China exclusively by women to record the songs and stories of their inner selves this unique book profiles dozens of scripts and the cultures they encapsulate offering glimpses of worlds unknown to us and ways of saving them from vanishing entirely [The World's Writing Systems](#) Peter T. Daniels, William Bright, 1996 Ranging from cuneiform to shorthand from archaic Greek to modern Chinese from Old Persian to modern Cherokee this is the only available work in English to cover all of the world's writing systems from ancient times to the present Describing scores of scripts in use now or in the past around the world this unusually comprehensive reference offers a detailed exploration of the history and typology of writing systems More than

eighty articles by scholars from over a dozen countries explain and document how a vast array of writing systems work how alphabets ideograms pictographs and hieroglyphics convey meaning in graphic form The work is organized in thirteen parts each dealing with a particular group of writing systems defined historically geographically or conceptually Arranged according to the chronological development of writing systems and their historical relationships within geographical areas the scripts are divided into the following sections the ancient Near East East Asia Europe South Asia Southeast Asia and the Middle East Additional parts address the ongoing process of decipherment of ancient writing systems the adaptation of traditional scripts to new languages new scripts invented in modern times and graphic symbols for numerical music and movement notation Each part begins with an introductory article providing the social and cultural context in which the group of writing systems was developed Articles on individual scripts detail the historical origin of the writing system its structure with tables showing the forms of the written symbols and its relationship to the phonology of the corresponding spoken language Each writing system is illustrated by a passage of text and accompanied by a romanized version a phonetic transcription and a modern English translation A bibliography suggesting further reading concludes each entry Matched by no other work in English *The World's Writing Systems* is the only comprehensive resource covering every major writing system Unparalleled in its scope and unique in its coverage of the way scripts relate to the languages they represent this is a resource that anyone with an interest in language will want to own and one that should be a part of every library's reference collection

Writing Systems of the World Florian Coulmas, 1991-01-08 This book is an account of the writing systems of the world from earliest times to the present Its aim is to explore the complex ways in which writing systems relate to the language they depict Writing Coulmas contends is not only the guide or garment of spoken language but has a deep and lasting effect on the development of language itself His study takes in Egyptian hieroglyphics and the cuneiform system of the ancient Near East he describes Chinese writing discussing why an apparently cumbersome system has been used continuously for more than 3 000 years he ranges across the writing systems of western Asia and the Middle East the Indian families and the various alphabetic traditions which had its origins in the multifarious world of Semitic writing and came to full bloom in pre Classical Greece

Writing Systems of the World [?], 1980 This unique book presents 29 scripts in detail and offers examples of many more

Writing Systems and Their Use Dimitrios Meletis, Christa Dürscheid, 2022-06-21 Grapholinguistics the multifaceted study of writing systems is growing increasingly popular yet to date no coherent account covering and connecting its major branches exists This book now gives an overview of the core theoretical and empirical questions of this field A treatment of the structure of writing systems their relation to

speech and language their material features linguistic functions and norms as well as the different types in which they come is complemented by perspectives centring on the use of writing incorporating psycholinguistic and sociolinguistic issues such as reading processes or orthographic variation as social action Examples stem from a variety of diverse systems such as Chinese English Japanese Arabic Thai German and Korean which allows defining concepts in a broadly applicable way and thereby constructing a comparative grapholinguistic framework that provides readers with important tools for studying any writing system The book emphasizes that grapholinguistics is a discipline in its own right inviting discussion and further research in this up and coming field as well as an overdue integration of writing into general linguistic discussion
