Understanding Unreliable Narrators:

Understanding Unreliable Narrators Michael William Smith,1991 Intended for high school literature teachers this book reviews research in educational psychology and reading comprehension and outlines classroom activities for direct instruction and practice of interpretive strategies The book cites studies which reveal that if teachers distrust students ability to interpret literature effectively they may dominate classroom discussion and bore students by confining them to short answers It describes direct teaching experiments in which students comprehension of literature improved when they were taught to distinguish between different kinds of questions The book discusses research in which students successfully used a set of questions to detect irony in literature and offers another set of questions to help students understand that in fiction they will encounter fallible narrators The book maintains that discussions small group work and other activities help students get below the surface of literature relate it to life and move toward independent interpretations The book offers interpretive units constructed around three short stories and provides checklists reproducible handouts and a bibliography MG

The Transformative Power of Literature and Narrative: Promoting Positive Change Corinna Assmann, Jan Rupp, Christine Schwanecke, 2023-01-16 Narrative plays a central role for individual and collective lives this insight has arguably only grown at a time of multiple social and cultural challenges in the 21st century The present volume aims to actualize and further substantiate the case for literature and narrative taking inspiration from Vera N nning s eminent scholarship over the past decades Engaging with her formative interdisciplinary work the volume seeks to explore

potentials of change through the transformative power of literature and narrative to be harnessed by individuals and groups as agents of positive change in today's world. The book is located at the intersection of cognitive and cultural narratology and is concerned with the way literature affects individuals, how it works at an intersubjective level enabling communication and community, and how it furthers social and cultural change.

Annual Summary of Investigations Relating to Reading, July 1, 1995 to June 30, 1996 International Reading Association, Newark, DE., 1997. This book, the 72nd and last in the annual series, summarizes approximately 500 reports of reading research identified between July 1, 1995 and June 30, 1996. The research studies in the book are categorized into 6 major areas: 1. summaries of reading research; 2. teacher preparation and practice; 3. sociology of reading; 4. physiology and psychology of reading; 5. the teaching of reading; and 6. reading of atypical learners. All but the first category in the book are further subcategorized, and individual studies within subcategories are grouped by subject. An author index and a list of journals monitored conclude the book.

RS The Unreliable Narrator James Ferry, 2017. The primary goal of this paper is to gain a better understanding of the unreliable narrator as a literary device. Furthermore, I argue that the distance between an author and narrator in realist fiction can be simulated in autobiographical prose. While previous studies have focused mainly on extra- and intertextual incongruities, factual inaccuracies, disparities between two nonfiction texts, the present study attempts to demonstrate that the memoirist can employ unreliable narration intratextually as a rhetorical tool. The paper begins with some examples of how the unreliable narrator is used, interpreted, misused, and misinterpreted. The device's troubled history is examined. Wayne Booth and James Phelan have argued for an encoded strategy on the part of the implied author, while Tamar Yacobi and Ansgar Nünning have embraced a reader-oriented model, as well as the recent and, in my opinion, inevitable convergence of the rhetorical and cognitive constructivist models.

Aside from "What is the unreliable narrator?" two questions underlie the present study: 1. Does a fiction writer using homodiegetic narration have an obligation to adhere to formal mimeticism? Do we believe it? 2. Being that unreliable narrators are so prevalent in everyday life, why is the device in nonfiction considered almost verboten? Two texts are analyzed for the first question: Fitzgerald's *The Great Gatsby* is argued to be a mimetically successful fictive memoir penned by a disillusioned, albeit reliable narrator; Ishiguro's *The Remains of the Day* is presented as a synthetically flawless example of unreliable narration, but alas, a mimetic failure. Likewise, two texts are analyzed for the second question: Nick Flynn's *Another Bullshit Night in Suck City* is viewed through the lens of overt fiction as a means of depicting uncertainty in autobiography. Similarly, Richard Wright's *Black Boy*, with its overarching themes of survival and deception, is examined for the narrator's use of tall tales. The critical and commercial success of both books suggests that the unreliable narrator does indeed have a place in autobiography, provided that the device is employed in service of a greater truth.

The Oxford Handbook of Reading Alexander Pollatsek, Rebecca Treiman, 2015 Writing is one of humankind s greatest inventions and modern societies could not function if their citizens could not read and write How do skilled readers pick up meaning from markings on a page so quickly and how do children learn to do so The chapters in the Oxford Handbook of Reading synthesize research on these topics from fields ranging from vision science to cognitive psychology and education focusing on how studies using a cognitive approach can shed light on how the reading process works To set the stage the opening chapters present information about writing systems and methods of studying reading including those that examine speeded responses to individual words as well as those that use eye movement technology to determine how sentences and short passages of text are processed The following section discusses the identification of single words by skilled readers as well as insights from studies of adults with reading disabilities due to brain damage Another section considers how skilled readers read a text silently addressing such issues as the role of sound in silent reading and how readers eyes move through texts Detailed quantitative models of the reading process are proposed throughout The final sections deal with how children learn to read and spell and how they should be taught to do so These chapters review research with learners of different languages and those who speak different dialects of a language discuss children who develop typically as well as those who exhibit specific disabilities in reading and address questions about how reading should

be taught with populations ranging from preschoolers to adolescents and how research findings have influenced education
