Work Redesign Lotte Bailyn,Joyce K. Fletcher,2004 This paper makes the argument that issues surrounding the connections between work and family can be a catalyst for organizational change if the emphasis is on work redesign instead of on family policies Change comes about by challenging the current institutional context that sees gender and family issues as completely independent of the way that work is accomplished The paper analyzes the theoretical implications of this separation and gives examples where changes in work practices grounded in unquestioned rules values and norms have benefited both people s ability to integrate work with their personal lives as well as the effectiveness of the organization In other words equity and effectiveness are shown not to be

adversarial but complementary even synergistic The approach is based on a collaborative interactive action research CIAR model *Personnel Management in Government* Jay M. Shafritz, Albert C.
