The 5x questions checklist for an effective hybrid workplace model

01 What do people want?

As mentioned above, a successful hybrid work strategy and hybrid workspace model can only work if it's designed to the people.

Before making any significant decisions or investments, it's important to understand the preferences, needs, and expectations of the people you want to work for.

The way to build a hybrid work model is to first understand what your employees want and then design the workspace and policies to support them.

How do you know what your employees want? The best way to find out is to ask them. Conduct surveys, focus groups, and interviews to understand their needs and preferences. This information will help you design a hybrid work model that is tailored to your organization and your employees.
