Russian military intelligence in cyberspace* Antonio Villalón-Huerta, 2025-07-04 This book provides an in depth view of the GRU the Russian military intelligence agency in cyberspace With its Soviet roots the GRU is a secretive organization that conducts hostile operations in both kinetic and cyber domains Particularly in cyberspace the GRU has developed powerful capabilities through various military units and a full spectrum of techniques These capabilities allow the agency to conduct a wide range of cyberspace operations from sabotage and espionage to psychological warfare The complexity of some of these operations combined with the GRU s high risk appetite and Spetsnaz like mindset makes it one of the most formidable and sophisticated cyber threat actors

Russian Strategic Nuclear Forces Oleg Bukharin, Frank Von Hippel, 2004 A comprehensive databook of technical and institutional facts about the Soviet and Russian nuclear arsenal Dictatorship and Information Martin K. Dimitrov, 2023 Fear pervades dictatorial regimes Citizens fear leaders the regime s agents fear superiors and leaders fear the masses The ubiquity of fear in such regimes gives rise to the dictator s dilemma where autocrats do not know the level of opposition they face and cannot effectively neutralize domestic threats to their rule The dilemma has led scholars to believe that autocracies are likely to be short lived Yet some autocracies have found ways to mitigate the dictator s dilemma As Martin K Dimitrov shows in *Dictatorship and Information* substantial variability exists in the survival of nondemocratic regimes with single party polities having the longest average duration Offering a systematic theory of the institutional solutions to the dictator s dilemma Dimitrov argues that single party autocracies have fostered channels that allow for the confidential vertical transmission of information while also solving the problems associated with distorted information To explain how this all works Dimitrov focuses on communist regimes which have the longest average lifespan among single party autocracies and have developed the most sophisticated information gathering institutions Communist regimes face a variety of threats but the main one is the masses Dimitrov therefore examines the origins evolution and internal logic of the information collection ecosystem established by communist states to monitor popular dissent Drawing from a rich base of evidence across multiple communist regimes and nearly 100 interviews Dimitrov reshapes our understanding of how autocrats learn or fail to learn
