**Measuring Disaster Preparedness** Margaret O'Leary,2004-06 This publication describes the elements of performance measurement and provides guidance on how to manage the indicator development process summarize data and use indicator data to improve readiness *Building Community Resilience to Disasters* Anita Chandra,2011 Community resilience or the sustained ability of a community to withstand and recover from adversity has become a key policy issue at federal state and local levels including in the National Health Security Strategy Because resources are limited in the wake of an emergency it

is increasingly recognized that resilience is critical to a community's ability to reduce long recovery periods after an emergency. This report provides a roadmap for federal, state, and local leaders who are developing plans to enhance community resilience for health security threats and describes options for building community resilience in key areas. Based on findings from a literature review and a series of community and regional focus groups, the authors provide a definition of community resilience in the context of national health security and a set of eight levers and five core components for building resilience. They then describe suggested activities that communities are pursuing and may want to strengthen for community resilience and they identify challenges to implementation.
