

TON VERSTEGEN

From the notion of tropism – the directional movements of growth

## TROPISMS

(turning) made by organisms under the influence of external forces –

### Metaphoric Animation

Ton Verstegen tries to connect language and architecture. After an

### and Architecture

exploration of the figure of the turn in a variety of fields such as

biology, aesthetics, and literature, the author confronts this figure

## **Tropisms Metaphoric Animation And Architecture:**

**Tropisms** Ton Verstegen,2001 The term tropism refers to the growth characteristics exercised by organisms under the influence of external forces Contextualizing his argument in biology aesthetics and literature Ton Verstegen applies this figure to those architectures in which movement and dynamics play a central role Verstegen argues that spatial animation always entails metaphoric or conceptual animation providing examples from a variety of architects and demonstrating how computer technologies in design have affected the possibilities of movement in architecture *Aesthetics & The Philosophy Of Spirit* John Shannon Hendrix,2005 The Symposium and the aesthetics of Plotinus The aesthetics of Schelling Plotinian hypostases in Hegel s Phenomenology of spirit The aesthetics of Hegel Architecture and the philosophy of spirit Plotinus Estetik Schelling Friedrich Wilhelm Joseph von 1775 1854 Estetik Hegel Georg Friedrich Wilhelm 1770 1831 Estetik Estetik Tarih

**Unmodern Architecture** Hans Ibelings,2004 In the Netherlands for decades a bastion of modernism neomodernism and supermodernism a contemporary traditionalism has been causing a stir since the 1990s Traditionalists draw from the past and prefer means that have already proved their worth Contemporary traditionalism stripped of all populist and moralistic arguments for and against is analysed from different angles including an international and historical perspective

**Imaginary Economics** Olav Velthuis,2005 A British artist who destroys all of his possessions a Dutch artists initiative that provides analyses of business cultures an American who draws his own money and then manages to spend it The age of thinking that art has nothing to do with the economy is clearly over Imaginary Economics has to do with artists who analyze and parody economic processes and phenomena in their work Aside from well known figures from twentieth century art such as Marcel Duchamp Yves Klein Marcel Broodthaers and Joseph Beuys a great many contemporary artists including Jeff Koons Santiago Sierra Rob Scholte Michael Landy and Matthieu Laurette appear to be interested in the economy as well Economically inspired art can evidently be seen as a refreshing source of knowledge on our market economy From an unorthodox vantage point Olav Velthuis economics editor of de Volkskrant sheds new light on the world of big money Book jacket
