The Saito Conducting Method:

The Saito Conducting Method Hideo Saitō, 1988 *The Saito Conducting Technique Enhances Artistic Conducting* Cynthia L. Hutton, 1999 **The Instrumentalist** Traugott Rohner, 1991 The magazine for school band and orchestra directors **Beyond the Baton** Diane Wittry, 2007 Publisher description *Baton Basics* Diane Wittry, 2014 Conducting is not simply the act of marking beats it is the much more rich art of communicating emotion character and mood through movement to a large group of performers in order to inspire them to create music together Baton Basics is based on the premise that the most effective and musical forms of conducting are about conveying energy and that doing so is a fundamentally physical activity In Baton Basics conductor Diane Wittry offers a unique approach to teaching conducting through familiar gestures weight resistance and energy combined with size beat placement The end goal is the ability to communicate a better concept of musical sound to the musicians Wittry demonstrates how conductors can communicate through gestures by training the muscles of their fingers hands wrists forearms and full arms She also provides techniques for releasing body tension improving posture and developing a deeper sense of calm on the podium through overall body and breathing exercises Additionally she guides the reader on an exploration of the concepts and diagrams of the Musin and Saito conducting methods and providing innovative suggestions on how to best incorporate these other styles into his or her own technique Featuring many detailed drawings and access to over 60 video examples on the companion website Baton Basics guides conductors away from simply marking beat patterns and towards a nuanced and phrased musicality that can be communicated to a group of musicians Baton Basics is a key foundational text for the student and experienced conductor alike and is must for anyone interested in improving and expanding their vocabulary of conducting gestures

Conducting the Wind Orchestra Eric L. Hinton, 2008 This book examines the conductor's methods in terms of the realization of expressive potential in a selected body of works This examination encompasses analytical technical and expressive gestural aspects of the art and craft of conducting The author also discusses the idea of meaning in music and ways both musical and extramusical in which meaning arises in performance In this unique study the author also considers how the use of physical gestures may have an impact upon the realization of expressive potential in a given work and in particular upon those works selected for discussion Central to this process is the notion that there is something behind the notes Text based modes of analysis do not afford access to music as it is created by the actions of performers and conductors The author argues that this music often has strong extroversive associations Inquiry limited to the text neither helps the interpreter to realise fully the expressive or communicative potential of that work nor does it fully consider the impact of expressive issues on performance Thus the conductor acts as a mediator in this process taking the work and all relevant information surrounding it into account as it is prepared for performance It is within this context that the author examines John Corigliano's Overture from Gazebo Dances Karel Husa's Introduction and Fanfare from Music for Prague 1968 Edward Gregson's Celebration and

Morning Music by Richard Rodney Bennett with regard to their expressive potential and adopts topical analysis in a general way as a point of departure in an attempt to relate this potential to physical gestures facial expressions and body language in the art and craft of conducting In addition the author considers the applicability of the analytical tools developed in the study to the actual practice of performance with regard to the works discussed and attempts to show the relationship between the analysis of a given work the physical manifestation of what that analysis uncovers and the realisation of expressive potential in performance This book will help readers better understand the relationship between the conductor's physical gestures body language and facial expressions and the expressive potential of selected works for the wind orchestra As a book that clearly reflects the author's passion it will be a welcome addition for collections in music
