Sympathy Science:

The Science of Sympathy Rob Boddice, 2016-11-11 In his *Descent of Man* Charles Darwin placed sympathy at the crux of morality in a civilized human society His idea buttressed the belief that white upper class educated men deserved their sense of superiority by virtue of good breeding It also implied that societal progress could be steered by envisioning a new blueprint for sympathy that redefined moral actions carried out in sympathy's name Rob Boddice joins a daring intellectual history of sympathy to a portrait of how the first Darwinists defined and employed it As Boddice shows their interpretations of Darwin's ideas sparked a cacophonous discourse intent on displacing previous notions of sympathy Scientific and medical progress demanded that cruel practices like vivisection and compulsory vaccination be seen as moral for their ultimate goal of alleviating suffering Some even saw the so called unfit natural targets of sympathy as a danger to society and encouraged procreation by the fit alone Right or wrong these early Darwinists formed a moral economy that acted on a new system of ethics reconceptualized obligations and executed new duties Boddice persuasively argues that the bizarre even dangerous formulations of sympathy they invented influence society and civilization in the present day

Gilbert Austin's "Chironomia" Revisited Sara Newman, Sigrid Streit, 2020-03-06 This first book length study of Irish educator clergyman and author Gilbert Austin as an elocutionary rhetor investigates how his work informs contemporary scholarship on delivery rhetorical history and theory and embodied communication Authors Sara Newman and Sigrid Streit study Austin's theoretical system outlined in his 1806 book *Chironomia or A Treatise on Rhetorical Delivery* an innovative study of gestures as a viable independent language and consider how Austin's efforts to incorporate movement and integrate texts and images intersect with present day interdisciplinary studies of embodiment Austin did not simply categorize gesture mechanically separating delivery from rhetoric and the discipline's overall goals but instead he provided a theoretical framework of written descriptions and illustrations that positions delivery as central to effective rhetoric and civic interactions Balancing the variable physical elements of human interactions as well as the demands of communication Austin's system fortuitously anticipated contemporary inquiries into embodied and nonverbal communication Enlightenment rhetoricians scientists and physicians relied on sympathy and its attendant vivacious and lively ideas to convey feelings and facts to their varied audiences During the seventeenth and eighteenth centuries as these disciplines formed increasingly distinct specialized boundaries they repurposed existing shared communication conventions to new ends While the emerging standards necessarily diverged each was grounded in the subjective embodied bedrock of the sympathetic magical tradition

The club is led by Henry Winter, a brilliant and charismatic young man. Henry is obsessed with Greek mythology and philosophy, and he quickly draws Richard into his world. The other members of the Classics Club are equally as fascinating. Bunny Corcoran is a wealthy and spoiled young man who is always looking for a good time. Charles Tavis is a quiet and reserved young man who is deeply in love with Henry. Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The students are all deeply in love with Morrow, and they are willing to do anything to please him. Morrow is a complex and mysterious figure, and he seems to be manipulating the students for his own purposes. As the students become more involved with Morrow, they begin to commit increasingly dangerous acts. The Secret History is an exceptional and thrilling novel that will keep you guessing until the very end. The novel is a cautionary tale about the dangers of obsession and the power of evil.
