

syntax

- The way in which words and clauses are ordered and connected so as to form sentences; or the set of grammatical rules governing such word-order. Syntax is a major determinant of literary style : while simple English sentences usually have the structure 'subject-verb-object' (e.g. *Jane strangled the cat*), poets often distort this syntax through inversion , while prose writers can exploit elaborate syntactic structures such as the periodic sentence .

Syntax Style In Chaucers Poetry:

Syntax and Style in Chaucer's Poetry Gregory H. Roscow, 1981 The purpose of this book is to give an outline of structural features of Chaucer's poetic syntax that are relevant to the study of style and to define some general tendencies in his construction of sentences What emerges is a fondness on Chaucer's part for discontinuity in the order of words and phrases and for certain forms of expression which have a wider application than their modern counterparts In order that Chaucer's usage may be seen in its historical context comparative material is drawn from the writings of his contemporaries Langland Gower and the Gawain poet and from the body of early English rhyming romances now taken to represent an influential native poetic tradition I In an introductory chapter Dr Roscow questions the familiar description of Chaucer's syntax as colloquial and argues for attention to a wider range of literary functions in studying the relationship between syntax and style in medieval poetry
