Untangling Ecological Complexity Brian A. Maurer, 1999-02 Acknowledgments Ch 1 Of Entangled Banks and Humble Bees Ch 2 From Micro to Macro and Back Again Ch 3 Communities on Small Spatial and Temporal Scales Ch 4 Communities as Linear Systems Ch 5 Communities as Nonlinear Systems Ch 6 Macroecology Expanding the Spatial Scale of Community Ecology Ch 7 Geographic Range Structure Niches Written in Space Ch 8 Geographic Assembly of Local Communities Ch 9 The Evolution of Species Diversity at the Macroscale Ch 10 The Macroscopic Perspective and the Future of Ecology Literature Cited Index Copyright Libri GmbH All rights reserved Ecological Issues in a Changing World Sun-Kee Hong, John A. Lee, Byung-Sun Ihm, A. Farina, Yowhan Son, Kim Eun-Shik, Jae C. Choe, 2007-11-05 Problems of scale have exercised the minds of ecologists for many years and will continue to do so into the future This volume deals with this subject and with mathematical approaches to improve our understanding of complex ecological systems The book also concentrates on monitoring the responses of ecosystems especially to human impacts upon them The importance of spatial separation of function at both the landscape and ecosystem level forms an important theme Finally this special book focuses on large scale issues discussing in particular important applied ecological problems and how these can be managed through a variety of planning processes Many examples of major ecological problems in the mainstream ecological literature are drawn from Europe and North America In contrast many of the most pressing ecological problems are to be found elsewhere in the world This volume is composed of four parts according to scale objectives and application of modern ecological research Part I covers emerging concepts and models in the ecosystem complex and in the landscape Part II Biological responses to environmental changes pattern and process Part III Ecological networking and restoration technology theory and practice and finally a summary of 8th INTECOL Congress and possible future directions are covered in Part IV *Ecological Understanding* Steward T.A. Pickett, Jurek Kolasa, Clive G. Jones, 2010-08-04 This widely anticipated revision of the groundbreaking book *Ecological Understanding* updates this crucial sourcebook of contemporary philosophical insights for practicing ecologists and graduate students in ecology and environmental studies The second edition contains new ecological examples an expanded array of conceptual diagrams and illustrations new text boxes summarizing important points or defining key terms and new reference to philosophical issues and controversies Although the first edition was recognized for its clarity this revision takes the opportunity to make the exposition of complex topics still clearer to readers without a philosophical background Readers will gain an understanding of the goals of science the structure of theory the kinds of theory relevant to ecology the way that theory changes what constitutes objectivity in contemporary science and the role of paradigms and frameworks for synthesis within ecology and in integration with other disciplines Finally how theory can inform and anchor the public use of ecological knowledge in civic debates is laid out This new edition refines the understanding of how the structure and change of theory can improve the growth and application of one of the 21st century s

key sciences Explains the philosophical basis of ecology in plain English Contains chapter overviews and summaries Text boxes highlight key points examples or controversies Diagrams explain structure and development of theory and integration Evaluates and relates paradgims in ecology Illustrates philosophical issues with classic and new ecological research

Landscape Handbook Olaf Kühne, Florian Weber, Karsten Berr, Corinna Jenal, 2025-10-21 This handbook presents different perspectives on landscapes and illuminates various landscape understandings from different disciplines Written by experts in the field it provides an overview of landscape research s current status and sheds light on the future of the field The handbook examines theoretical perspectives of landscape research landscape in the context of disciplinary references meta perspective approaches to landscape methods of landscape research and practice and fields of investigation of landscape research Therefore this handbook is an excellent resource for students lecturers and researchers of landscape architecture urban and regional planning social sciences and geography

Modern Approaches to the Visualization of Landscapes Dennis Edler, Corinna Jenal, Olaf Kühne, 2021-01-31 The volume deals with the effects of digitization on spatial and especially landscape construction processes and their visualization A focus lies on the generation mechanisms of landscapes with digital tools of cartography and geomatics including possibilities to model and visualize non visual stimuli but also spatial temporal changes of physical space Another focus is on how virtual spaces have already become part of the social and individual construction of landscape Potentials of combining modern media of spatial visualization and constructivist landscape research are discussed

Sustainable Development Alexander D. Maples, 2005 Ecology is the study of the interrelationships between organisms and their environment including the biotic and abiotic components There are at least six kinds of ecology ecosystem physiological behavioural population and community specific topics include Acid Deposition Acid Rain Revisited Biodiversity Biocomplexity Carbon Sequestration in Soils Coral Reefs Ecosystem Services Environmental Justice Fire Ecology Floods Global Climate Change Hypoxia and Invasion This book presents new research on sustained development from around the world

Environmental Colloids and Particles Kevin J. Wilkinson, Jamie R. Lead, 2007-01-30 This text presents the current knowledge of environmental colloids and includes reviews of the current understanding of structure role and behaviour of environmental colloids and particles whilst focussing directly on aquatic systems and soils In addition there is substantial critical assessment of the techniques employed for the sampling size fractionation and characterisation of colloids and particles Chemical physical and biological processes and interactions involving colloids are described and particular attention is paid to quantitative approaches that take account of particle heterogeneity and polydispersity Presents critical reviews of the state of the art knowledge of environmental colloids Critical assessment of techniques employed for the sampling size fractionation and characterisation of colloids and particles are given Theoretical and experimental aspects of the methods as well as the required developments and possible recommendations are discussed Each chapter gives a brief introduction general enough for the non specialist Written by a internationally recognized group of contributors
