HMS Terror Matthew Betts,2020-10-30 In the summer of 1845 Sir John Franklin and a crew of 134 men entered Lancaster Sound on board HMS Erebus and HMS Terror in search of a Northwest Passage The sturdy former bomb ships were substantially strengthened and fitted with the latest technologies for polar service and at the time were the most advanced sailing vessels developed for Polar exploration Both ships but especially HMS Terror had already proven their capabilities in the Arctic and Antarctic With such sophisticated rugged and successful vessels victory over the Northwest Passage seemed inevitable yet the entire crew vanished and the ships were never seen again by Europeans Finally in 2014 the wreck of HMS Erebus was discovered by Parks Canada Two years later the wreck of HMS Terror was found sitting upright in near pristine condition The extraordinarily well preserved state and location of the ships so far south of their last reported position raises questions about the role they played in the tragedy Did the extraordinary capabilities of the ships in fact contribute to the disaster Never before has the Franklin Mystery been comprehensively examined through the lens of its sailing technology This book documents the history design modification and fitting of HMS Terror one of the world s most successful polar exploration vessels Part historical narrative and part technical design manual this book provides for the first time a complete account of Terror s unique career as well as an assessment of her sailing abilities in polar conditions a record of her design specifications and a full set of accurate plans of her final 1845 configuration Based on meticulous historical research the book details the ship s every bolt and belying pin and ends with the discovery and identification of the wreck in 2016 explaining how the successes and ice worthiness of Terror may have contributed to the Franklin disaster itself It is an ideal reference for those interested in the Franklin Mystery in polar exploration the Royal Navy and in ship design and modelling

The More We Know Eric Klopfer,Jason Haas,2012-09-21 The rise and fall of iCue lessons about new media old media and education from an NBC MIT joint venture into interactive learning In 2006 young people were flocking to MySpace discovering the joys of watching videos of cute animals on YouTube and playing online games Not many of them were watching network news on television they got most of their information online So when NBC and MIT launched iCue an interactive learning venture that combined social networking online video and gaming in one multimedia educational site it was perfectly in tune with the times iCue was a surefire way for NBC to reach younger viewers and for MIT to test innovative educational methods in the real world But iCue was a failure it never developed an audience and was canceled as if it were a sitcom with bad ratings In *The More We Know* Eric Klopfer and Jason Haas both part of the MIT development team describe the rise and fall of iCue and what it can teach us about new media old media education and the challenges of innovating in educational media Klopfer and Haas show that iCue was hampered by among other things an educational establishment focused on teaching to the test television producers uncomfortable with participatory media and confusion about the market But this is not just a cautionary tale sometimes more can be learned from an interesting failure than a string of successes Today's educational technology visionaries iPads for everyone might keep this lesson in mind **Wonders of the Air** Tamra Andrews,2004-11-30 This second book in a four book series exploring the elements *Wonders of Nature Natural Phenomena in Science and Myth* looks at the wonder of air from both a scientific and mythical perspective Intended for teachers and librarians to use with students in intermediate and middle school grades the book looks at natural phenomena that occurs in

the air around us such as rainbows snow tornadoes lightning and thunder through ancient myth and details the explanations of modern day science With this interdisciplinary approach students will be encouraged to appreciate the magic in both myth and science and to understand the commonality of human experience with nature over time Each book contains eight myths each from a different culture and accompanying scientific explanation to use with students Included are bibliographies recommended Web sites ideas for field trips student projects discussion and activities and illustrations and diagrams that will enhance student interest Grades 4 8
