Visual Spatial Enquiry Robyn Creagh, Sarah McGann, 2018-12-07 *Visual Spatial Enquiry* explores visual and textual ways of working within spatial research Architects and spatial thinkers from the arts social sciences and humanities present rich case studies from remote and regional settings in Australia to the suburbs of Los Angeles and from gallery and university settings to community collaborations in Mongolia Through these case studies the authors reappraise and reconsider research approaches methods and processes within and across their fields In spatial research diagramming can be used as a method to synthesise complex concepts into a succinct picture whereas metaphors can add the richness of lived experiences Drawing on the editors own architectural backgrounds this volume is organised into three key themes seeing doing and making space In seeing space chapters consider observational research enquiries where developing empathy for the context and topic is as

One of the significant advantages of Split Vision books and manuals for download is the cost-saving aspect. Traditional books and manuals can be costly, especially if you need to purchase several of them for educational or professional purposes.
