Practical Conservation Josephine Atkinson, Islamic Arts Museum Malaysia, 2009 Different climates present different conservation challenges Tropical conditions are among the most challenging of all Although collectors care about their artefacts as much as museums do they do not usually have the facilities to treat them as they deserve With Practical Conservation the Islamic Arts Museum Malaysia aims to bring the expertise of its conservators to a wider audience This easy to read book explains how far collectors can go in looking after their own collections Whatever the setting or the type of artefact prevention is better than cure The techniques that have been outlined in Practical Conservation are a combination of common sense and acquired conservation knowledge There are many books on conservation available but most are relevant to temperate surroundings With Asia becoming home to an increasing number of collections it is more essential than ever for owners in this part of the world to understand their artefacts and learn how to care for them

Museums in Motion Juilee Decker, 2024-08-06 This book explores the histories and functions of museums while also looking at the current standing of museums and their ongoing efforts toward relevance resiliency and future proofing Section I examines the beginnings of museums with chapters dedicated to art and design museums natural history and anthropological museums science museums museums focused history and the past and gardens zoos and children s museums Emphasis is on museums in the United States with some historical framing beyond the U S Section II explores the primary functions of museums including conservation exhibition interpretation engagement and

service Section III examines museums from within by exploring critical issues and contemporary movements facing museums and our society transparency and openness labor and equity belonging and coalition building risk taking and risk aversion and sustainability and empathy Advocating for change rather than death to museums Museums in Motion demonstrates the very premise that museums have been in motion all along as they have shifted from their rather simple form of a treasury storehouse and tomb to something much more complex by deeply considering where museums have come from where they are today and where they are going Entirely new to this edition Section III Museum Aspirations features five new chapters each centered around topics rather than a museum type or museum function Each topic is meant to be a micro narrative and springboard for a conversation about museums today and their sustainability in the future The chapters examine museums from the inside museum workers and their voices especially as well as power held by people and institutions and DEIA without using those individual words as chapter headings On their own or in conjunction with the chapters in the previous sections of this book these chapters serve as vignettes that can help readers to understand where how and why we need to apply critical lenses to institutions and articulate how doing so helps us to understand this historical moment and ultimately how we can realize resiliency and sustainability for museums and those who make their existence possible
