## **Value Based Management:**

**Value Based Management For Organizational Excellence** Editors: Santosh Dhar, Upinder Dhar, Rajesh K Jain, Sapna Parashar, 2009 *Investor Expectations in Value Based Management* Magdalena Mikołajek-Gocejna, 2014-06-27

Understanding the process of shaping investor expectations is essential to describe and predict changes in the value of assets on the financial markets especially stock prices on the capital markets and thus the value of companies listed on them. The main objective of this book is to include the investor expectations in the concept of enterprise value management and measurement of shareholders value creation. It seems that the role of expectations as a determinant of investment decisions on the capital market requires a deep insight and highlight the importance of managing the expectations for creating value for shareholders in particular in the context of the financial crisis of 2007-2009. Creating value for shareholders is to overcome investor expectations for the rate of return on their initial investment. That means that managers must understand how investors build their expectations. According to studies conducted by T Copeland and A Dolgoff there is a strong and statistically significant relation between the shareholders returns and the two types of variables: changes in expectations for the future earnings and changes in the level of interference of provided information. Almost 50% of the variance of return rates can be explained by these two variables. Studies have also shown that changes in expectations for long term profits have a significant and immediate impact on the share price. Readers of this book will be able to understand the process of investor expectation formulation, will know how to create value in response to investor expectations and how to consciously shape investor expectations in order to increase company value.
