# The 5x questions checklist for an effective hybrid workplace model

01 What do people want?

As mentioned above, a successful hybrid work strategy and hybrid workplace model can only work if it's designed for the people.

Before making any significant decisions or investments, it's important to understand the preferences, needs, and expectations of the employees you want to attract, and the employees who will stay with you long-term.

You want to build a workplace model in which all roles, functions, and employees are designed to work together effectively and efficiently, and to address the most common challenges facing your team.

How do you think about how you should design a successful hybrid workplace model? How do you think about the experience of your employees? How do you think about the experience of your employees? How do you think about the experience of your employees?
