Russian Federation's claim to international influence and power projection capabilities Doctrine is the reflection of a nation's character and air power doctrine is influenced by the strategic culture of a nation Nowhere else is this more apparent than in the case of the Russian Air Force The Red Air Force has been directly influenced by the political upheavals in the Soviet Union and now Russia but has displayed exemplary resilience in continuing to provide adequate support for government policies The impact of political ideology on the development of doctrine and air power has not been greater in any other air force around the world This book is an extension of a doctoral thesis produced in 2005 and is essential reading for anyone trying to come to grips with the intricate relationship that exists between national security imperatives political ideology and the development of military doctrine Back cover *International Warbirds* John C. Whiting, 1976 **Soviet Military Power**, 1984 *Journal of the Aeronautical Sciences*, 1940 **Aviation**, 1922 **The Soviet Air Forces** Paul J. Murphy, 1984 **Aviation Week & Space Technology**, 1922 Includes a mid December issue called Buyer guide edition Blitzkrieg to Desert Storm Robert Michael Citino, 2004 When Germany launched its blitzkrieg invasion of France in 1940 it forever changed the way the world waged war Although the Wehrmacht ultimately succumbed to superior Allied firepower in a two front war its stunning operational achievement left a lasting impression on military commanders throughout the world even if their own operations were rarely executed as effectively Robert Citino analyzes military campaigns from the second half of the twentieth century to further demonstrate the difficulty of achieving decisive results at the operational level

Offering detailed operational analyses of actual campaigns Citino describes how UN forces in Korea enjoyed technological and air superiority but found the enemy unbeatable provides analyses of Israeli operational victories in successive wars until the Arab states finally grasped the realities of operational level warfare in 1973 and tells how the Vietnam debacle continued to shape U S doctrine in surprising ways Looking beyond major power conflicts he also reveals the lessons of India s blitzkrieg like drive into Pakistan in 1971 and of the senseless bloodletting of the Iran Iraq War Citino especially considers the evolution of U S doctrine and assesses the success of Desert Storm in dismantling an entrenched defending force with virtually no friendly casualties He also provides one of the first scholarly analyses of Operation Iraqi Freedom showing that its plan was curiously divorced from the realities of military history grounded instead on nebulous theories about expected enemy behavior Throughout Citino points to the importance of mobility especially mobilized armor in modern operational warfare and assesses the respective roles of firepower training doctrine and command and control mechanisms Brimming with new insights Citino s study shows why technical superiority is no guarantee of victory and why a thorough grounding in the history of past campaigns is essential to anyone who wishes to understand modern warfare Blitzkrieg to Desert Storm provides that grounding as it addresses the future of operational level warfare in the post 9 11 era
