Key Themes in Health and Social Care Adam Barnard, Verusca Calabria, Louise Griffiths, 2023-04-10 This revised and expanded second edition of *Key Themes in Health and Social Care* is a learning resource for students in health and social care. It provides an overview of foundational issues and core themes in the field and introduces key areas of debate moving from an introductory level to in-depth discussion as the book progresses. Divided into three parts, the first part sets the scene addressing introductory psychology and sociology, social policy, equality and diversity, skills for practice and working with people; the second part considers key themes such as mental health and wellbeing, management of services, the relationship between place and wellbeing, research in health and social care, and person-centred interventions; the third part looks at discrete areas of practice such as mental health, ageing, leading and managing health and social care, working with vulnerable populations, and health promotion. Each chapter begins with an outline of the content and learning outcomes and includes reflective exercises to allow students to reflect on what they have read, review their learning, and consolidate their understanding. Time-pressed readers wanting to dip into the book for relevant areas can do so, but read from cover to cover. The book provides a comprehensive introduction to the key areas of contemporary health and social care practice. It will be particularly helpful for students undertaking health and social care undergraduate and foundation degrees.

Simon Biggs explores these possibilities by integrating psychodynamic and social perspectives to provide new insights into how older age is imagined, defined, and experienced. Old age is more often than not hidden from the not-yet-old by belief in a potentially negative personal future and by a commonsense world that allows little opportunity for active collaboration between age groups. This book examines the conscious and unconscious attitudes and feelings of practitioners towards their older clients and looks at the ways in which these feelings affect their ability to function as professionals should. By studying self-perception, communication, and power relations and applying his conclusions to the helping professions, institutions, and community care, Simon Biggs unsettles easy assumptions, offers a new framework for constructive social gerontology, and gives priorities for improved practice. *Understanding Ageing* should be of interest to a broad range of students and professionals alike.
