Life Advice from Below Eric C. Hendriks, 2017-07-03. In *Life Advice from Below*, Eric C. Hendriks offers the first systematic comparative study of the globalization of American style self-help culture and the cultural conflicts this creates in different national contexts. The self-help guru is an archetypal American figure associated with individualism, materialism and the American Dream. Nonetheless, the self-help industry is spreading globally, thriving in China and other seemingly unlikely

places Controversy follows in its wake as the self help industry operating outside of formal education and state institutions outflanks philosophical religious and political elites who have their own visions of the Good Life Through a comparison of Germany and China Hendriks analyzes how the competition between self help gurus and institutional authorities unfolds under radically different politico cultural regimes This witty book charms its way through a very serious sociology of the seriously quirky field of self help books Read it for its fascinating pop culture insights and you ll come away with a deep understanding of contemporary sociological theory Highly recommended Salvatore Babones University of Sydney Hendriks finding that Germany rather than China is more resistant to self help gurus offers a powerful corrective to the assumption in much of the globalization literature that the greatest cultural divide is between the Anglo Western European sphere and the rest of the globe Rodney Benson New York University
