## How to Sleep Better

**Sleep in a comfortable bed with non-toxic, pleasing bedclothes**

**Expose yourself to natural stimuli**  
*(e.g., sunlight, the surface of the Earth)*

**Stress down in the hours before bed**  
*(e.g., minimize cell phone usage and stressful work activities)*

**Minimize your exposure to artificial light at night**  
*(e.g., use candles, install light-adjustment software on your PC)*

**Work on improving your general health**  
*(e.g., by addressing your microbiome and immune status)*

**Exercise, but not directly before you hit the sack**

**Consider taking a cold shower or bath prior to sleeping**

**Stick to a routine**  
*(e.g., go to bed at roughly the same time most days)*

**Avoid brain stimulants**  
*(e.g., sugary foods, carbs-rich dairy products, coffee)*

**Sleep in a cool, ventilated, dark room**

**Brain Oscillations and Predictive Coding: What We Know and What We Should Learn** Roumen Kirov, 2017-04-28 Predictive coding PC is a neurocognitive concept according to which the brain does not process the whole qualia of external information but only residual mismatches occurring between incoming information and an individual inner model of the world At the time of issue initiation I expected an essential focus on mismatch signals in the brain especially those captured by neurophysiologic oscillations This was because one most plausible approach to the PC concept is to identify and validate mismatch signals in the brain Announcing the topic revealed a much deeper consideration of intelligible minds of researchers It turned out that what was of fundamental interest was which brain mechanisms support the formation maintenance and consolidation of the inner model determining PC Is PC a dynamic construct continuously modulated by external environmental or internal mental information

The reader will be delighted to get acquainted with the current views and understanding of eminent scholars in the field It will be challenging to discover the realm of sleep where both physiological energy preserving and mental qualia principles build on the inner models to shape and transform the self And where neurophysiologic oscillations may both transmit external information and translate inner models from state to state to preserve the self continuity and compactness

**The School of Greatness** Lewis Howes,2015-10-27 When a career ending injury left elite athlete and professional football player Lewis Howes out of work and living on his sister s couch he decided he needed to make a change for the better He started by reaching out to people he admired searching for mentors and applying his past coaches advice from sports to life off the field Lewis did more than bounce back He built a multimillion dollar online business and is now a sought after business coach speaker and podcast host In *The School of Greatness* Howes shares the essential tips and habits he gathered in interviewing the greats on his wildly popular podcast of the same name In discussion with people like Olympic gold medalist Shawn Johnson and Pencils of Promise CEO Adam Braun Howes figured out that greatness is unearthed and cultivated from within The masters of greatness are not successful because they got lucky or are innately more talented but because they applied specific habits and tools to embrace and overcome adversity in their lives A framework for personal development *The School of Greatness* gives you the tools knowledge and actionable resources you need to reach your potential Howes anchors each chapter with a specific lesson he culled from his greatness professors and his own experiences to teach you how to create a vision develop hustle and use dedication mindfulness joy and love to reach goals His lessons and practical exercises prove that anyone is capable of achieving success and that we can all strive for greatness in our everyday lives
