Translated ... by another Spaniard Spain,1800 Decisions and Orders of the National Labor Relations Board United States. National Labor Relations Board,1983 **A Millennial View of Spain's Development** Leandro Prados de la Escosura,2024-08-05 This open access book presents the evolution of the Spanish economy over the past seven centuries since the end of the Reconquest and examines how much economic progress has Spain achieved as well as its impact on living standards and income distribution over the very long run It shows that preindustrial Spain was far from stagnant although levels of output per head in the early nineteenth century were not much different from those on the eve of the Black Death 1348 It further discusses how phases of simultaneous per capita output and population expansion and shrinkage alternated lending support to the recurring growth and frontier economy hypotheses While a collapse in the 1570s gave way to sluggish growth and higher inequality after a long phase of sustained growth and lower inequality the book shows how real per capita income has improved substantially over the last two centuries driven by increased labor productivity and derived from more intense and efficient use of physical and human capital per worker Presenting exposure to international competition as a stimulus for this development the book sheds light on the underperformance of Spain up to 1950 in a European comparison and describes the catch up of Spain's economy with more advanced countries until 2007 Finally the book explains how modern economic growth is associated with an increase in the material well being of its inhabitants as the most dynamic economic phases of the last century have been associated with an improvement in income distribution although the relationship between growth and inequality has not been linear This book is a must read for students researchers and scholars of economics and economic history interested in a better understanding of cliometrics long run analyses economic development economic growth as well as the Spanish economy **Observations Made with the Prime Vertical Transit Instrument, 1893-1912** United States Naval Observatory,George Andrews Hill,1926 **The Bible in Spain** George Borrow,1907 Custom and its Interpretation in International Investment Law: Volume 2 Panos Merkouris,Andreas Kulick,José Manuel Álvarez-Zarate,Maciej Żenkiewicz,Konrad Turnbull,2024-01-18 At first glance one may think of international investment law as a response to custom or lack thereof instead of a field of its application However in fact the opposite is the case The interpretation and application of customary rules and principles are the bread and butter of international investment law and arbitration With a diverse range of expert contributors this collection traces how customary international law is practised in international investment law It considers how custom should be interpreted and how its rules and principles should be understood and applied by investor state arbitral tribunals Raising and addressing vital questions surrounding custom and international law this collection is a necessary contribution to the scholarship of the theory and history of customary international law and international investment law This title is also available as Open Access on Cambridge Core
