Spatial Population Analysis Philip H. Rees, Alan Geoffrey Wilson, 1977 **Spatial population analysis** P.H. Rees, Frans Willekens, Andrei Rogers, 1978 *Computer Manual 23. Smith, 1976 *GIS in Spatial Population Analysis and Regional Economic Development* Hui Lin, 1998 Population Dynamics and Projection Methods John Stillwell, Martin Clarke, 2011-02-15

Although the human population growth rate of the world has been declining since peaking in the early 1960s the populations of individual countries are changing at different rates Population dynamics at national level are partly determined by levels of fertility and mortality but the impact of international migration is playing an increasingly important role Moreover internal migration plays a major part in population change at the sub national level This fourth volume in the series *Understanding Population Trends and Processes* is a celebration of the work of Professor Philip Rees It contains chapters by contributors who have collaborated with Phil Rees on research or consultancy projects or as postgraduate students Several chapters demonstrate the technical nature of population projection modelling and simulation methods while others illustrate issues relating to data availability and estimation This book demonstrates the application of theoretical and modelling methods and addresses key issues relating to contemporary demographic patterns and trends **Population Geography: Progress & Prospect (Routledge Revivals)** Michael Pacione, 2013-10-14 First published in 1986 this book presents a comprehensive overview of the contemporary state of knowledge in the field of population geography It discusses the contemporary state of the art and surveys new research developments and new thinking in the major branches of the subject It thereby provides an introductory guide to contemporary trends and forms a reference point for future development in the subject *Handbook of Contemporary Chinese Social Sciences* Ping Hao, 2025-10-09 This Handbook presents thorough literature reviews and detailed analyses on the development of China's social sciences research since the reform and opening up in 1978 The handbook is comprised of 4 sections politics and law sociology and economics demography and education journalism studies and library science Written and edited by leading scholars from Peking University each volume critiques the research findings and provides guidance for future investigations of the respective field Given its scope the handbook will offer international academics an in depth and up to date understanding of the development of Chinese scholars research on Chinese social sciences over the past forty years *Contemporary Research in Population Geography* John Stillwell, Henk J. Scholten, 2012-12-06 Significant changes have occurred in the structural composition and geographical distribution of the populations of North West European countries during the 1970s and 1980s Whilst the subject matter of

this volume reflects many of the important themes of research activity that have preoccupied British and Dutch spatial demographers and population geographers over the last decade the structure of the book aims to facilitate comparison of those selected themes between the United Kingdom and the Netherlands The book has gradually taken shape over the period of time since the conference in Oxford in 1986 when the contents were first presented We are very grateful for the assistance that we have received during the production process from Marjie Salisbury Tim Hadwin and John Dixon at the School of Geography University of Leeds from Annemieke Perquin at the National Physical Planning Agency in The Hague and from Evert Meijer Elmy Heuvelmans and Berry van Houten at GEODAN in Amsterdam We also wish to acknowledge the contributions to the field of population geography that have been made in recent years by John Coward who died so tragically in the Kegworth air disaster earlier this year

Geospatial Technology and the Role of Location in Science Henk J. Scholten, Rob Velde, Niels van Manen, 2009-07-06 Globalisation has not led to the death of geography Intensified relations between communities in different parts of the world have only highlighted the need for understanding and managing phenomena on a variety of geographic scales From global warming to credit crunch and from epidemics to terrorism causes and solutions are sought on local regional national as well as inter continental levels With the advent of Geospatial Technology scholars policymakers and entrepreneurs have valuable tools in hand to proceed This book offers the first systematic account of the science behind this mental and technological revolution Tracing the adoption and dissemination of Geospatial Technology in a range of disciplines it examines the impact this technology has had and is likely to have on the explanation of spatial behaviour phenomena and processes At the same time stressing innovative usage it explores scientific contributions to technology advancement
