Understanding Gmdss:

Understanding Gmdss David Calcutt, Laurie Tetley, 1994-07-07 This is the first book to cover the Global Marine Distress and Safety System GDMSS in a comprehensive and readable way GDMSS is now being developed to provide a new global communications and locating network to alert search and rescue services and all students of navigation or maritime technology and practising navigation officers will need to be trained in its use This accessible reference textbook provides students and new radio operators with all the knowledge necessary for a complete understanding of GMDSS and its related systems

Electronic Navigation Systems Laurie Tetley, David Calcutt, 2007-06-07 Maritime navigation has rapidly developed since the publication of the last edition of the title with methods of global position fixing for shipping becoming standardized As in the previous two editions this edition will provide a sound basis for the understanding of modern navigation systems and brings the student or professional up to date with the latest developments in technology and the growing standardization of maritime navigation techniques Developed with close scrutiny from the US Merchant Marine Academy and the major maritime navigation centres in the UK out dated techniques have been replaced by an expanded section on the now standard Navstar GPS systems and the Integrated Nav In addition a new chapter on the application of electronic charts will also be included as well as problems at the end of each chapter with worked solutions

Satellite Communications David Calcutt, Laurie Tetley, 1994-08-01 Satellites are increasingly used for global communications as well as for radio and television transmissions With the growth of mobile communications and of digital technology the use of satellite systems is set to expand substantially and already all students of electronics or communications engineering must study the subject This book steers a middle path between offering a basic understanding of the process of communication by satellite and the methodology used and the extensive mathematical analysis normally adopted in similar texts It presents the basic concepts using as much mathematical content as is necessary to make the process understandable The principles introduced are backed up by examples of actual applications showing how professional systems engineers have achieved the required system performance capabilities The practical systems chosen are representative of modern day applications and comprise an international communications system an international maritime system and a regional system

Global Mobile Satellite Communications Theory Stojče Dimov Ilčev, 2016-09-23 This book discusses current theory regarding global mobile satellite communications GMSC for maritime land road and rail and aeronautical applications It covers how these can enable connections between moving objects such as ships road and rail vehicles and aircrafts on one hand and on the other ground telecommunications subscribers through the medium of communications satellites ground earth stations Terrestrial Telecommunication Networks TTN Internet Service Providers ISP and other wireless and landline telecommunications providers This new edition covers new developments and initiatives that have resulted in land and aeronautical applications and the introduction of new satellite constellations in non geostationary orbits and projects of new

hybrid satellite constellations The book presents current GMSC trends mobile system concepts and network architecture using a simple mode of style with understandable technical information characteristics graphics illustrations and mathematics equations The first edition of Global Mobile Satellite Communications Springer 2005 was split into two books for the second edition one on applications and one on theory This book presents global mobile satellite communications theory Global Mobile Satellite Communications Applications Stojce Dimov Ilcev,2017-11-11 This book discusses global mobile satellite communications GMSC for maritime land road and rail and aeronautical applications It covers how these enable connections between moving objects such as ships road and rail vehicles and aircrafts on one hand and ground telecommunications subscribers through the medium of communications satellites ground earth stations Terrestrial Telecommunication Networks TTN Internet Service Providers ISP and other wireless and landline telecommunications providers The new edition covers new developments and initiatives that have resulted in land and aeronautical applications and the introduction of new satellite constellations in non geostationary orbits and projects of new hybrid satellite constellations The book presents current GMSC trends mobile system concepts and network architecture using a simple mode of style with understandable technical information characteristics graphics illustrations and mathematics equations It represents telecommunications technique and technology which can be useful for all technical staff on vessels at sea and rivers on all types of land vehicles on planes on off shore constructions and for everyone possessing satellite communications handset phones The first edition of Global Mobile Satellite Communications Springer 2005 was split into two books for the second edition one on applications and one on theory This book presents global mobile satellite communications applications
