Roush,2011-01-11 What is the great wonder in watching birds anyway Bird watching is actually about the excitement of spotting a new kind of bird each time Birds after all are fascinating creatures They are a spectacle to watch because their colors can be attractive They are also very tame and domesticated They are not afraid of human contact so they can be drawn in and fed which adds to their lovable and delightful appeal Some bird types can be really attention grabbing creatures With their remarkable colors feathers and form one would think they ve come across a truly exotic and rare find It is an interesting fact that there are thousands of registered avid bird watchers around the country These are people from all walks of life with varied interests and outlooks that share a common delight in these flying creatures These avid bird watchers form bird watching clubs and make it a point to gather together every week month or year with other avid bird watchers from around the nation or around the world They either simply go bird watching on regular spots or go to extreme adventures to discover new species in the hopes of getting featured in Discovery Channel or NatGeo Channel as the first man or woman to have discovered a new bird variety in this lifetime This book will help you learn all about birds and guide you through a wonderful new hobby in bird watching so that you can join a bird watching club and go on one bird watching adventure to another **Watching Birds** James Fisher,2010-11-30 This revised edition of the late James Fisher s much praised Watching Birds is the work of Dr Jim Flegg Director of the British Trust for Ornithology In his Preface Dr Flegg writes It is a daunting task to revise the bird book on which you cut your teeth it is the surest measure

of the man who wrote it that what is needed after thirty odd years is an updating and not a sweeping revision Among James Fisher s deservedly popular writings *Watching Birds* was probably the most read and consulted After several reprints published by Penguin Books he planned to re write it and it is wholly appropriate that the work should now be done by Dr Flegg who like the original author has done much to help arouse and stimulate a widening interest in watching and understanding the life and world of birds It is an indication of that interest today that radio and TV programmes in which Dr Flegg has frequently participated have audiences of millions Such numbers are hardly surprising since few leisure activities offer as effective or as gratifying an antidote to the pressures of modern life as birdwatching and few can be as readily and inexpensively pursued at almost any time anywhere *Watching Birds* has been an introduction and an item of basic equipment to tens of thousands of birdwatchers in the past and this new and revised edition is assured of an even wider audience Jacket colour photograph by Jim Flegg
