## **Water Lifting Devices:**

Water Lifting Devices Peter L. Fraenkel, Jeremy Thake, 2006 This publication examines the costs and general suitability of the different technologies to enable farmers and policy makers to make informed choices More than one billion people still do not have access to safe drinking water and almost two billion people suffer from diseases arising from contaminated water due to poor sanitation Irrigation is essential for the basic food requirements of billions of people The growing world population and global climate change make the challenges of providing adequate clean water sanitation and food ever more pressing At the heart of effective irrigation lies the problem of lifting or pumping water This handbook provides a detailed review of the water lifting technologies available for irrigation along with new information covering the provision of drinking water for humans and livestock The book provides an overview of the entire spectrum of pumps and water lifting devices for small scale applications and a basis for comparing and choosing between them The main purpose is to provide a comprehensive single source of practical information for decision makers concerned with the selection sizing and procurement of water lifting systems and their power sources for both the supply of drinking water and for small scale irrigation Publisher's description

**Water Lifting Devices for Irrigation. Prepared by Aldert Molehaar** Food and Agriculture Organization of the United Nations Staff,  
Greek and Roman Mechanical Water-Lifting Devices Joseph Peter Oleson, 1984-12-15 Water is fundamental to human life and the ways in which a society uses it can tell us a great deal about a people The ancient Greeks and Romans had at their disposal several mechanical water lifting devices The water screw the force pump the compartmented wheel and the bucket chain were developed by scientists associated with the great school at Alexandria Application of these devices was sporadic in the Hellenistic world but they and the later saqiya gear were used in a wide range of rural and urban settings in many parts of the Roman Empire Professor Oleson has prepared a definitive study of mechanical water lifting devices in the Greek and Roman world He systematically and thoroughly

examines the literary papyrological and archaeological evidence for the devices and considers the design materials settings costs effectiveness and durability of the many adaptations of the small basic repertoire of models The literary and papyrological materials range from Deuteronomy to papyri of the seventh century AD and the archaeological sites discussed range from Babylon to Wales An extensive collection of illustrations complements the literary papyrological and archaeological evidence for this remarkable ancient technology
