Ten Lectures on Cognitive Linguistics and the Unification of Spoken and Signed Languages Sherman

Wilcox,2017-11-06 In Ten Lectures on Cognitive Linguistics and the Unification of Spoken and Signed Languages Sherman Wilcox suggests that rather than abstracting away from the material substance of language linguists can discover the deep connections between signed and spoken languages by taking an embodied view This embodied solution reveals the patterns and principles that unite languages across modalities Using a multidisciplinary approach Wilcox explores such issues as the how to apply cognitive grammar to the study of signed languages the pervasive conceptual iconicity present throughout the lexicon and grammar of signed languages the relation of language and gesture the grammaticization of signs the significance of motion for understanding language as a dynamic system and the integration of cognitive neuroscience and cognitive linguistics

Dao and Sign in History Daniel Fried,2018-10-29 Provides a new perspective on important linguistic issues in philosophical and religious Daoism through the comparative lens of twentieth century European philosophies of language From its earliest origins in the Dao De Jing Daoism has been known as a movement that is skeptical of the ability of language to fully express the truth While many scholars have compared the earliest works of Daoism to language skeptical movements in twentieth century European philosophy and have debated to what degree early Daoism does or does not resemble these recent movements Daniel Fried breaks new ground by examining a much broader array of Daoist materials from ancient and medieval China and showing how these works influenced ideas about language in medieval religion literature and politics Through an extended comparison with a broad sample of European philosophical works the book explores how ideas about language grow out of a given historical moment and advances a larger argument about how philosophical and religious ideas cannot be divided into content and context Fried combines the disciplines of semiotics with a largely philosophical approach thus offering fresh insights into both disciplines while looking at issues from multiple perspectives Steven Burik author of
