Religion, Spirituality, and Public Health Karen O'Brien-Kop, Suzanne Newcombe, 2025-10-14 Religion Spirituality and Public Health focuses on exploring the role of different ways of knowing or arriving at truth i e epistemes particularly those found in religious and alternative health milieus While biomedical solutions offer a dominant narrative these are articulated differently in global contexts Moreover individuals often draw upon alternative framings that are sometimes oppositional to and at other times engaged with directives from medical and governmental authorities The focus of this volume is worldviews and epistemes that are often marginalised or rejected in dominant discourses from shamanism in Korea to African Pentecostalism in Britain and from global online AntiVax narratives to traditional Siddha medicine in South India Detailed case studies explore the contested competing and strategically aligned relationships between mainstream and marginal epistemes between religious healing spirituality and biomedicine and between politics and belief These explorations promote greater insight into how marginalised religious epistemes are employed Which beliefs and practices are drawn upon to create meaningful and effective responses And how can we better understand the depth and breadth of these reactions to design more successful public health strategies for future global health crises

Psychotherapy in a Religious Framework L. Rebecca Propst, 1988 *Youth Programs in Art Museums* Heather Maxson, Susan McCullough, Ai Wee Seow, 2025-11-21 Youth Programs in Art Museums examines the processes and motivation behind the creation of thoughtful offerings for youth audiences by museums around the world With over 50 contributors representing 20 countries the book considers how museums can be relevant to youth audiences through the development and implementation of programs that respond to their interests and needs and are grounded in cultural contexts Program outcomes explored include developing young artists civic engagement LGBTQIA advocacy and multiple language learners As a whole the volume demonstrates how museums are creating engaging enriching programs that enable youth to more deeply understand themselves their culture and the world around them The editors and contributors show that if museums can plan and deliver the right kind of offerings they will find that youth are curious creative and resilient They will also discover that youth have the potential to become lifelong engaged participants in their own art culture and communities in turn helping museums to be more inclusive responsive and community oriented Youth Programs in Art Museums will appeal to academics and students engaged in the

study of museums art and education It will also be of interest to museum professionals as well as professionals interested in working with youth in after school settings

Scientific Research on Spirituality and Health David B. Larson,James P. Swyers,Michael E. McCullough,1998 **Journal of Geriatric Psychiatry** ,1996 **The Ampleforth Journal** ,1982 *Corrections* Jeanne B. Stinchcomb,2005 *Where God and Science Meet* Patrick McNamara Ph.D.,2006-09-30 In this far reaching and novel work experts from across the nation and around the world present evolutionary neuroscientific and psychological approaches to explaining and exploring religion including the newest findings and evidence that have spurred the fledgling field of neurotheology Spiritual practices or awakenings have an impact on brain mind and personality These changes are being scientifically predicted and proven For example studies show Buddhist priests and Franciscan nuns at the peak of religious feelings show a functional change in the lobes of their brain Similar processes have been found in people with epilepsy which Hippocrates called the sacred disease New research is showing that not only does a person s brain activity change in particular areas while that person is experiencing religion epiphany but that such events can be created for some people even self professed atheists by stimulating various parts of the brain It is not the goal of neurotheology to prove or disprove the existence of God but to understand the biology of spiritual experiences Such experiences seem to exist outside of time and space caused by the brain losing its perception of a boundary between physical body and outside world Understanding why this is the case could help explain other intangible events such as altered states of consciousness possession supposed alien visitations near death experiences and out of body events Understanding how and why these abilities evolved in the brain could also help us understand how religion contributes to the survival of the human race
