## Spaces Of Chillida:

*Spaces of Chillida* Eduardo Chillida, Gabriel Celaya, 1974 *Spaces of Chillida Espacios* Outlet, Outlet Book Company Staff, Random House Value Publishing Staff, Rh Value Publishing, 1980-01-09 [Chillida--questions and Space](#) Eduardo Chillida, 1986 [Chillida. Ediz. italiana e inglese](#) Matthias Bärmann, Eduardo Chillida, 1999 Basque abstract sculptor Eduardo Chillida b 1924 has been recognized with numerous international awards and his works can be found in great museums public spaces and private collections all over the world **Chillida** Eduardo Chillida, 1985 [Chillida](#) Eduardo Chillida, J. M. Tasende, 1986\* **The Architecture of the Playing Field** Richard L. Cleary, 2025 The author argues that sports and architecture share many concerns as both center the interplay of settings and bodies in motion He sets out to study their conceptual and physical intersection and to show what the aesthetics and spatial relationships of playing fields can tell us about sports and the cultures that create them Cleary's scholarly background and personal experience as a fencer and soccer referee led him to the questions that drive this project In this relatively brief meditation on physical space in sports he argues convincingly that related inquiries in one domain can inspire new readings in others while respecting the unique qualities of each The Sports Center fan the architecture enthusiast and the balletomane have more to discuss than they may think The subjects of Cleary's intriguing new readings range widely from the translucent courts of the 2019 Women's World Squash Championships to the introduction of the three point line in basketball to the similarities between Dutch architects and Dutch soccer's emphasis on flexibility and multivalence **The Place of Silence** Mark Dorrian, Christos Kakalis, 2020-02-06 The Place of Silence explores the poetics and politics of silence in architecture Bringing together contributions by internationally recognized scholars in architecture and the humanities it explores the diverse practices affects politics and cultural meanings of silence silent places and silent buildings in historical and contemporary contexts What counts as silence in specific situations is highly relative and the term itself carries complex and varied significations which make it a revealing field of study Chapters explore a range of themes from the apparent loss of silence in the contemporary urban world through designed silent spaces to the forced silences of oppression catastrophe or technological breakdown The book unfolds a rich and complementary array of perspectives which address through the lens of architecture and place questions of sound atmosphere and attunement together building a volume which will form the key scholarly resource on architecture and silence [The Sculpted Ear](#) Ryan McCormack, 2020-04-17 Sound and statuary have had a complicated relationship in Western aesthetic thought since antiquity Taking as its focus the sounding statue a type of anthropocentric statue that invites the viewer to imagine sounds the statue might make The Sculpted Ear rethinks this relationship in light of discourses on aurality emerging within the field of sound studies Ryan McCormack argues that the sounding statue is best thought of not as an aesthetic object but as an event heard by people and subsequently conceptualized into being through acts of writing and performance Constructing a history in which hearing plays an integral

role in ideas about anthropocentric statuary McCormack begins with the ancient sculpture of Laocoön before moving to a discussion of the early modern automaton known as Tipu's Tiger and the statue of the Commendatore in Mozart's Don Giovanni Finally he examines statues of people from the present and the past including the singer Josephine Baker the violinist Aleksandar Nikolov and the actor Bob Newhart with each case touching on some of the issues that have historically plagued the aesthetic viability of the sounding statue McCormack convincingly demonstrates how sounding statues have served as important precursors and continuing contributors to modern ideas about the ontology of sound technologies of sound reproduction and performance practices blurring traditional divides between music sculpture and the other arts A compelling narrative that illuminates the stories of individual sculptural objects and the audiences that hear them this book will appeal to anyone interested in the connections between aurality and statues in the Western world in particular scholars and students of sound studies and sensory history Chillida Eduardo (Chillida Juantegui) Chillida,1985 **Curating**

**Consciousness** Marcia Brennan,2010 In Curating Consciousness Marcia Brennan focuses on one of the transformational figures of 20th century curatorial culture and the main protagonist of this until now unacknowledged curatorial practice

Aesthetics After Metaphysics Miguel Beistegui,2012-08-21 This book focuses on a dimension of art which the philosophical tradition from Plato to Hegel and even Adorno has consistently overlooked such was its commitment explicit or implicit to mimesis and the metaphysics of truth it presupposes De Beistegui refers to this dimension which unfolds outside the space that stretches between the sensible and the supersensible the space of metaphysics itself as the hypersensible and show how the operation of art to which it corresponds is best described as metaphorical The movement of the book then is from the classical or metaphysical aesthetics of mimesis Part One to the aesthetics of the hypersensible and metaphor Part Two Against much of the history of aesthetics and the metaphysical discourse on art he argues that the philosophical value of art doesn't consist in its ability to bridge the space between the sensible and the supersensible or the image and the Idea and reveal the sensible as proto conceptual but to open up a different sense of the sensible His aim then is to shift the place and role that philosophy attributes to art **ArchiSculpture** Markus Bröderlin,Friedrich Teja Bach,Fondation Beyeler,2004 In

this lavish collection artist Rob Kessler and seed morphologist Wolfgang Stuppy of the Millennium Seed Bank at the Royal Botanic Gardens Kew present a natural history of seeds illustrated with close up photographs and scanning electron micrographs The images afford an unprecedented view into a most astonishing microcosm where even the tiniest examples are exquisitely beautiful and sophisticated in fact Kessler's work has been called mystifying astounding and awe inspiring by scientists and critics around the world Seeds constitutes an essential source book not only for those fascinated by the natural world but also for artists designers and anyone interested in the development of biological structures This brand new edition features a preface by HRH the Prince of Wales himself an avid conservationist With its studied narrative and beautiful photographic eye this keepsake volume is a stunning tribute to the beauty and marvel of seeds Seeds are the most complex

organs plants ever produce A major keystone in the evolution of land plants the first seeds appeared some 360 million years ago Since then they have developed into highly sophisticated propagules that have enabled plants to dominate the Earth s surface and conquer almost every possible habitat from the Antarctic to the hottest deserts The diversity of shapes and sizes encountered in seeds is nearly endless and ranges from the impressive Seychelles nut at twenty kilos to the dustlike seeds of the orchids No matter how small packed into every seed is the complete genetic information needed to give rise to a new plant whether it is a tiny herb or a giant rainforest tree True time capsules of life seeds may travel thousands of miles and if necessary wait for hundreds of years before germinating
