Sparing Nature:

Sparing Nature Jeffrey Kevin McKee, 2003 This text asserts that a stroke should be thought of as a syndrome or collection of disease processes rather than a single disease Strokes are characterized by restriction of blood flow to the brain and are responsible for imposing a very significant burden on healthcare systems accounting for more than four million deaths per year They can be directly linked to the majority of adult neurological disability and they contribute to vascular dementia the second most common cause of dementia after Alzheimer s Disease Despite its importance on a population basis research into the genetics of strokes has lagged behind many other disorders however the situation is changing and there is now growing evidence that genetic factors are important in the stroke risk often acting via interactions with conventional risk factors

Ending the War Between Humanity and Nature Patrick C. Lee, 2020-08-19 This book offers plausible explanations for people s puzzling unwillingness to address the human nature interactions that have led us to the precipice that is climate change today Humanity and nature are at war the evidence is all around us catastrophic weather events rising sea levels extinction of species famine wildfires melting polar ice millions of environmental refugees and toxic pollution of air water and soil The list goes on and on What is causing this war and how can it be stopped Is this war an unintended consequence of economic and environmental imperatives pulling in opposite directions This book takes the question and its answer to a deeper level It argues that the root cause of our war on nature might be found in the time honored historically deep myths narratives and stories we tell ourselves and have been telling ourselves for centuries about humanity s place in or out of the natural world
