

Roland Kirk *Third Dimension*

This is an album of progressive jazz played by Roland Kirk. He is featured on a tenor sax, a straight alto and a straight soprano sax. Each time these instruments are heard in this album, Roland is playing all three at the same time.

The soprano saxophone is rarely heard in a jazz album. This is perhaps true because the instrument has never held a high popularity among jazz musicians. Many saxophonists have never been able to capture the true tonal quality of the instrument. Due to the soulful feeling and the very fast execution Kirk has captured in this album, the soprano sax has come into its own as an instrument of jazz.

The style found on the alto sax in this album is perhaps quite reminiscent of the late Charlie Parker. Here, however, you can hear many passages that are distinctly Kirk's, all adding up to a wonderful sound.

The tenor sax is perhaps the most popular of all the reed instruments. Here Kirk again displays original styling and exceptional execution.

Roland Kirk was born in Columbus, Ohio, and attended the Ohio State School For The Blind there. He became an outstanding student in mathematics and also became a member of all the musical instruments in the reed family.

Roland, who has been blind since he was two years old, has not let this handicap his activities in many various fields. It is interesting to note that in addition to becoming a proficient musician in school he also was a member of the school's wrestling team.

Kirk began playing professionally when he was sixteen and was considered a master on his instrument—the tenor saxophone. For years Roland had listened to many of the famous instrumentalists—Parker on alto, Hodges on tenor, Gaddner on clarinet, etc.—and held such admiration for these famous stars that he became quite confident in his ability to learn to play like them. Three or four years ago the idea came to Roland's mind to create a gimmick for himself and bring his abilities to the ears of the public. Possessing a fabulous understanding for math and mechanics, he applied this talent to blowing three saxophones simultaneously. In the jazz field there never has been a musician who played more than one instrument who was also considered great on another. In Roland's case he is highly respected by other musicians of the jazz world for his ability to master improvisation on all three instruments heard in this album. Due to the uniqueness of his combo he is sought after by the leading jazz

clubs all over the country. His first big break came when he was heard by band leader Buddy Morrow who arranged for Roland to play with Duke Ellington on a suite of bands concert. He was met with such great approval that Morrow arranged for him to come to New York where he was signed and recorded by King Records.

The sides heard in this album, where three instruments are heard playing as a section are not gimmicks or recording techniques, but Kirk actually performing on three instruments at the same time. On several sides, however, Kirk is blowing straight reed solo on one instrument and improvising on another. The improvisations in such cases are over-the-top, made possible by modern recording techniques.

Roland is very creative and two of the sides here are his original compositions. It is interesting to observe the manner in which Kirk handles all three instruments when playing harmony. Several tunes contained here will show that the role of which one horn is being sustained while he blows moving parts with the other two.

Even if the listener cannot visualize how complicated it is to play all three instruments at one time he can still enjoy the music as if it were three great jazz artists performing as an ensemble.
