## Thinking Back:

**The Mystery and the World** Maria Clara Bingemer, 2016-05-10 During the past century an enormous effervescence of events changed the sociopolitical configuration of the world The interpretation of these facts helped further deepen the crisis in which modern thought already found itself and it generated the uncertain and unstable environment in which we live today the so called postmodernity late modernity or hypermodernity In this context one of the most profound impacts is most certainly the one on religion During the twentieth century religion proved not to be banished from the human horizon as the masters of suspicion intended Known as the godless century the twentieth century saw also a resuscitation of the search for the sense of life and spirituality With the crisis of modern reason humankind turned toward consumerism and provisional and light practices The last century represents not only the height of the postmodernization process but also the rescue of the transcendent and absolute even if it is an absolute without face and identity It is in this scenario that religious experiences apparently exiled by modern rationality begin to occur and multiply again Mystical experiences will be then the basis for highlighting recurrent characteristics with universal import But they will show a different configuration than before One will be able to find them not in so called sacred spaces but in very secular ones not so much within institutions but at the borders or even outside them not configured by a specific tradition but in an interface that makes more than one tradition meet and dialogue

**Hypnosis** Robert Shor, 2017-09-08 Although research and practice in hypnosis has seen unprecedented expansion there has been a definite lack of inclusive and comprehensive surveys to aid the student and researcher This collection of original chapters written by leading experimental investigators is the first work to offer a current state of the art in hypnosis research A compendium of the historical background theories issues and trends in hypnosis this volume represents all major experimental viewpoints while providing a virtual who's who in the field of hypnosis The first two chapters written by the editors establish the current theoretical base of the field and review the historical background Seventeen contributions focus directly on key aspects of present day hypnosis research These contributions are organized as surveys of broad topic areas descriptions in depth of individual investigator's programmatic lines of research and reports on research within specific areas especially those representing new viewpoints and holding promise for programmatic development A final chapter develops questions for future research Offering an inclusive survey of the field from its historical inceptions to its current and predictive state this book presents many new ideas while updating established positions in research and theory The vital areas covered in connection with hypnosis include psychophysiology creativity dreams imagination suggestibility simulator controls cognitive activity and ego psychological theory In addition there are chapters on hypnosis as a research method the measurement of altered states of consciousness and hypnotic programming techniques in psychological experiments Hypnosis Research Developments and Perspectives is written for researchers in hypnosis and clinical practitioners in medicine and psychology The book will serve as a basic text in all courses in hypnosis at the graduate

level New Literary Hybrids in the Age of Multimedia Expression Marcel Cornis-Pope, 2014-11-15 Begun in 2010 as part of the Histories of Literatures in European Languages series sponsored by the International Comparative Literature Association the current project on New Literary Hybrids in the Age of Multimedia Expression recognizes the global shift toward the visual and the virtual in all areas of textuality the printed verbal text is increasingly joined with the visual often electronic text This shift has opened up new domains of human achievement in art and culture The international roster of 24 contributors to this volume pursue a broad range of issues under four sets of questions that allow a larger conversation to emerge both inside the volume's sections and between them The four sections cover 1 Multimedia Productions in Theoretical and Historical Perspective 2 Regional and Intercultural Projects 3 Forms and Genres and 4 Readers and Rewriters in Multimedia Environments The essays included in this volume are examples of the kinds of projects and inquiries that have become possible at the interface between literature and other media new and old They emphasize the extent to which hypertextual multimedia and virtual reality technologies have enhanced the sociality of reading and writing enabling more people to interact than ever before At the same time however they warn that as long as these technologies are used to reinforce old habits of reading writing they will deliver modest results One of the major tasks pursued by the contributors to this volume is to integrate literature in the global informational environment where it can function as an imaginative partner teaching its interpretive competencies to other components of the cultural landscape

**Irreconcilable Differences?** Jason C. Robinson, David Peck, 2015-03-17 What if philosophy theology and science spent a little more time together These fields often seem at odds butting metaphysical heads Instead of talking at how about talking with one another This book engages three academic disciplines distinct yet sharing much in common in a slice of conversation and community in which participants have aimed at validating the other and the way the other sees the world The result is a collection of essays united by a thread that can be hard to find in academia In bringing together a wide range of contributors on a project that at first seemed unlikely Irreconcilable Differences is also a testament to the spirit of cooperation and hard work evidence that small acts and events can make a big difference and that sometimes all you need in order to make something good happen is an idea with a little support along the way The editors of this collection are hopeful that its contributors and readers will keep looking for ways to bridge academic social and political gaps We need to forge relationships based on personal knowledge and proper confidence seeking to make meaningful claims in an increasingly complex world
