Coworking Spaces Janet Merkel, Dimitris Pettas, Vasilis Avdikos, 2023-11-07 This contributed volume considers the emergence of coworking as centered in labor issues. More specifically its chapters consider it as a coping mechanism in the worldwide rise of independent modes of work i.e. self employment that leaves more and more workers exposed to precarity as they must organize and manage their own labor. Grounded in this perspective this volume aims to understand the transformative social and political potentials emerging through coworking as a social and spatial practice. There is a distinct lack of discussion within coworking research on the emancipatory potentials of coworking and if it is discussed more cautionary views prevail highlighting the ambivalence of coworking spaces both as a space of alternative economic practices and as integrated into market economies. The aims of this collection are twofold. First it aims to make visible the plurality of existing practices around shared resources in coworking and the assemblages of human and non human actors as agents of change associated with coworking and the re organization of work and labor power. And second it aims to develop a more emancipatory narrative for coworking and the role of coworking spaces for workers but also the different spatial contexts in which these spaces are situated. A narrative that does not emphasize entrepreneurship or coworking as the epitome of the neoliberal entrepreneurial self as in the dominant interpretations in the current research but rather one that centers coworking in the creation of meaningful careful social relationships supporting empathy and an ethics that recognizes mutual interdependencies and builds a foundation for social change. So it is about alternative narratives emancipation politics and the wider social role that coworking spaces might play in neighborhoods cities or beyond because they are crucial contexts for the formation and maintenance of social relations. With this specific direction this collection aims to bring coworking research into a fruitful dialog with other research fields such as sociology of work feminist perspectives on care alternative and diverse economies post capitalist transformation critical geography positioning coworking within a range of progressive alternatives in the articulation of economic and social relationships. *European Narratives on Remote Working and Coworking During the COVID-19 Pandemic* Mina Akhavan, Marco Hölzel, Divya Leducq, 2023-05-02 This open access book offers a multidisciplinary and comprehensive perspective regarding the immediate and long term effects of the Covid 19 pandemic on coworking spaces in the European Region. The current pandemic has imposed several effects on work and spaces for work. Some are immediate effects and will last for a short time such as the closing down of the space some will last longer namely the reorganisation of the space to meet the physical distancing and some will stay for a long time remote working and hybrid working. Although the literature on coworking spaces and the effects of the pandemic is growing fast empirical studies are yet limited. Within this context this book seeks a twofold aim i) to contribute to the fast growing literature on coworking space and their effects at different scales ii) to present a multidisciplinary perspective about the effects of the yet lasting Corona pandemic effects on the patterns of remote working and consequently on coworking spaces.

Evolution of New Working Spaces Ilaria Mariotti, Elisabete

Tomaz, Grzegorz Micek, Carles Méndez-Ortega, 2024-02-27 This open access book provides multidisciplinary perspectives on the changing dynamics of new working spaces with insights from various European countries and observing critical theoretical approaches. Divided into two main parts, the first part focuses on the different typologies of new working spaces, identifying the changing nature of these spaces and associated concepts, taxonomies, and specific approaches to this phenomenon. The second part analyzes the location of new working spaces, examining its recent evolution and identifying new factors and geographies, offering an additional empirical analysis of different European realities. The research included in this book contributes to the current discussion of new forms and geographies of work and their impact on the territories and related policies.

The Coworking (R)evolution Diane-Gabrielle Tremblay, Gerhard Krauss, 2024-02-12

The digitalization of work processes and the generalization of IT are creating unprecedented opportunities. An increasing part of the workforce is experimenting with new forms of work, as freelancers, self-employed, or highly skilled employees with greater autonomy. International in scope, this book comprehensively explores these new models of work, mobility, and life trajectories, and the increasing role of non-metropolitan coworking spaces.

Digital Dreams, Urban Realities Milena Vukmirović, Aleksandra

Đukić, Eva Vaništa Lazarević, Aleksandra Krstić-Furundžić, 2025-08-16 This book is a forward-thinking exploration of the future of urban development. This insightful book dives deep into how cities can evolve to become more sustainable, resilient, and inclusive by applying the innovative principles of the New European Bauhaus. By blending science, technology, art, and culture, the book provides a holistic view of ecological transition, offering fresh perspectives on urban challenges. It draws on a rich collection of real-world case studies showcasing how these cutting-edge ideas are already being applied in cities across the globe. Each case study brings theory to life, providing actionable strategies that urban planners, architects, policymakers, and researchers can use to make a tangible impact in their own communities. A key highlight of the book is its emphasis on the importance of community involvement in urban planning. It explores how participatory design ensures that cities are not just built for people but by people, creating spaces that reflect the diverse needs and aspirations of local populations. In addition, this book explores the role of education in preparing the next generation of urban thinkers. It introduces innovative curricula designed to equip future architects, planners, and policymakers with the skills they need to lead the ecological transition. With an international focus, the book draws on examples from diverse regions, giving readers a global perspective on sustainable development. Whether you're looking to implement greener building practices, foster community engagement, or innovate within urban design, this book offers valuable insights and practical tools for making cities not just livable but truly thriving. This book is an essential read for anyone invested in the future of urban living. Ready to be part of the movement towards sustainable, beautiful, and inclusive cities? This book is your guide to turning that vision into reality.
