

The Hybrid Office is how leaders need to make the transition away from everyone

The 5x questions checklist for an effective hybrid workplace model

As mentioned above, a successful hybrid work strategy and hybrid workplace model can only work if it is designed for the people.

Before making any significant decisions or investments, it is important to understand the pain points of everyone involved in the decision-making process. Employees, all leaders, IT and, and all employees who would work both for them too.

You want to build a model that would in fact that all make things work for everyone, and address the most common challenges raised by your team.

How do you think about how you could deliver a personalized employee experience? How will that new workplace, functionalities and services support the experience of your people? Do you want the experience to be?

As decisions can be made by a few teams, the more planning is done, the more there is.

What do people want?
