Infrastructures of Reality: Metaverse Stories, Spaces, Bodies Chris Hesselbein,Paolo Bory,2025-08-09 This open access book focuses on two dimensions of the development of the metaverse that are crucial to reality namely spatiality and embodiment Metaversal technologies are thought to fundamentally affect both our spaces and bodies which are two central aspects of the constitution of social reality Both spatiality and embodiment are core elements of world making that are being pulled into the ambit of metaversal projects On the one hand metaversal technologies are profoundly spatial in the sense that they render space in virtual form or overlay digital layers onto pre existing physical spaces On the other hand metaversal technologies are directly geared towards the body in that they not only seek to extend or expand our embodied senses and emplace our bodies in virtual spaces but they also seek to capture their behaviours and actions on a far more granular level This can create new opportunities in terms of work social interaction and leisure but can also open our bodies up to new tech driven interventions and control Whether in the form of VR or AR such technologies not only reproduce space but also rely on making spaces more legible and open to automated interventions Taken together the metaversification of spaces and bodies gives rise to crucial questions about the goals and implications of metaversal developments by large technology companies and about the relationship between the developments of the metaverse and AI systems Drawing on our combined background and expertise in Science and Technology Studies and the History of Media and Communication we critically analyse the development of metaversal technologies and platforms by discussing a broad set of developments and examples from a wide range of technology and gaming companies Written in clear concise and accessible language and combining and applying novel theoretical frameworks and concepts to a currently emergent phenomenon this book will find a large audience not only within academic and professional circles but also in popular culture

Don't Use Your Words! Jane Juffer,2019-05-28 How

children are taught to control their feelings and how they resist this emotional management through cultural production Today even young kids talk to each other across social media by referencing memes songs and movements constructing a common vernacular that resists parental educational and media imperatives to name their feelings and thus control their bodies Over the past two decades children s television programming has provided a therapeutic site for the processing of emotions such as anger but in doing so has enforced normative structures of feeling that Jane Juffer argues weaken the intensity and range of children s affective experiences Don t Use Your Words seeks to challenge those norms highlighting the ways that kids express their feelings through cultural productions including drawings fan art memes YouTube videos dance moves and conversations while gaming online Focusing on kids between ages five and nine Don t Use Your Words situates these productions in specific contexts including immigration policy referenced in drawings by Central American children just released from detention centers and electoral politics as contested in kids artwork expressing their anger at Trump s victory Taking issue with the mainstream tendency to speak on behalf of children Juffer argues that kids have the agency to answer for themselves what does it feel like to be a kid
