## **Symposium On Complex Analysis:**

*The Madison Symposium on Complex Analysis* Edgar Lee Stout, 1992 This volume contains the proceedings of a Symposium on Complex Analysis held at the University of Wisconsin at Madison in June 1991 on the occasion of the retirement of Walter Rudin During the week of the conference a group of about two hundred mathematicians from many nations gathered to discuss recent developments in complex analysis and to celebrate Rudin's long and productive career Among the main subjects covered are applications of complex analysis to operator theory polynomial convexity holomorphic mappings boundary behaviour of holomorphic functions function theory on the unit disk and ball and some aspects of the theory of partial differential equations related to complex analysis Containing papers by some of the world's leading experts in these subjects this book reports on current directions in complex analysis and presents an excellent mixture of the analytic and geometric aspects of the theory

**Proceedings of the Symposium on Complex Analysis Canterbury 1973** J. Clunie, 1974-08-08 An international conference on complex analysis was held in Canterbury in July 1973 Some of the world's most prominent complex analysts attended and some outstanding open problems had their first solutions announced there These are reflected in this set of Proceedings Almost all of the contributions are abstracts of talks given at the symposium The final part of this volume is a section on research problems contributed by members of the conference and a report on a previous collection of problems edited by Professor W K Hayman after an earlier conference in 1964 This book is essential reading for research workers and graduate students interested in complex analysis

**The Madison Symposium on Complex Analysis**, 1992 Proceedings of the Conference on Complex Analysis A. Aeppli, E. Calabi, H. Röhrl, 2012-12-06 This volume contains the articles contributed to the Minnesota Conference on Complex Analysis COCA The Conference was held March 16-21 1964 at the University of Minnesota under the sponsorship of the U S Air Force Office of Scientific Research with thirty one invited participants attending Of these nineteen presented their papers in person in the form of one hour lectures In addition this volume contains papers contributed by other attending participants as well as by participants who after having planned to attend were unable to do so The list of participants as well as the contributions to these Proceedings clearly do not represent a complete coverage of the activities in all fields of complex analysis It is hoped however that these limitations stemming from the partly deliberate selections will allow a fairly comprehensive account of the current research in some of those areas of complex analysis that in the editors' belief have rapidly developed during the past decade and may remain as active in the foreseeable future as they are at the present time In conclusion the editors wish to thank first of all the participants and contributors to these Proceedings for their enthusiastic cooperation and encouragement Our thanks are due also to the University of Minnesota for offering the physical facilities for the Conference and to Springer Verlag for publishing these proceedings

Agranovsky, Matania Ben-Artz, Catherine Bénéteau, Lavi Karp, Dmitry Khavinson, Simeon Reich, David Shkheoit, Gilbert Weinstein, Lawrence Zalcman, 2017 A co publication of the AMS and Bar Ilan University This volume contains the proceedings of the Seventh International Conference on Complex Analysis and Dynamical Systems held from May 10 15 2015 in Nahariya Israel The papers in this volume range over a wide variety of topics in the interaction between various branches of mathematical analysis Taken together the articles collected here provide the reader with a panorama of activity in complex analysis geometry harmonic analysis and partial differential equations drawn by a number of leading figures in the field They testify to the continued vitality of the interplay between classical and modern analysis

Modern Methods in Complex Analysis (AM-137), Volume 137 Thomas Bloom, David W. Catlin, John P. D'Angelo, Yum-Tong Siu, 2016-03-02 The fifteen articles composing this volume focus on recent developments in complex analysis Written by well known researchers in complex analysis and related fields they cover a wide spectrum of research using the methods of partial differential equations as well as differential and algebraic geometry The topics include invariants of manifolds the complex Neumann problem complex dynamics Ricci flows the Abel Radon transforms the action of the Ricci curvature operator locally symmetric manifolds the maximum principle very ampleness criterion integrability of elliptic systems and contact geometry Among the contributions are survey articles which are especially suitable for readers looking for a comprehensive well presented introduction to the most recent important developments in the field The contributors are R Bott M Christ J P D Angelo P Eyssidieux C Fefferman J E Fornæss H Grauert R S Hamilton G M Henkin N Mok A M Nadel L Nirenberg N Sibony Y T Siu F Treves and S M Webster *Complex Analysis and Geometry* Pierre Dolbeault, A. Iordan, G.

Henkin, H. Skoda, J.-M. Trepreau, 2012-12-06 This meeting has been motivated by two events the 85th birthday of Pierre Lelong and the end of the third year of the European network Complex analysis and analytic geometry from the programme Human Capital and Mobility For the first event Mathematicians from Poland Sweden United States and France whose work is particularly related to the one of P Lelong have accepted to participate for the second the different teams of the Network sent lecturers to report on their most recent works These teams are from Grenoble Wuppertal Berlin Pisa and Paris VI in fact most of their results are also related to Lelong's work and a posteriori it is difficult to decide whether a talk is motivated by the first or by the second event We chose only plenary lectures usually of one hour except a small number given by young mathematicians which have been shorter A two hours problem session has been organized The Proceedings gather papers which are exact texts of the talks or are closely related to them The members from the Network and five other lecturers sent

us papers the other lecturers published the content of their talks in mathematical Journals All the presented texts have been submitted to referees independent of the organizing committee the texts of the problems have been approved by their authors

**Analysis and Geometry in Several Complex Variables** Gen Komatsu, Masatake Kuranishi, 2012-12-06 This volume consists of a collection of articles for the proceedings of the 40th Taniguchi Symposium Analysis and Geometry in Several Complex Variables held in Katata Japan on June 23-28 1997 Since the inhomogeneous Cauchy Riemann equation was introduced in the study of Complex Analysis of Several Variables there has been strong interaction between Complex Analysis and Real Analysis in particular the theory of Partial Differential Equations Problems in Complex Analysis stimulate the development of the PDE theory which subsequently can be applied to Complex Analysis This interaction involves Differential Geometry for instance via the CR structure modeled on the induced structure on the boundary of a complex manifold Such structures are naturally related to the PDE theory Differential Geometric formalisms are efficiently used in settling problems in Complex Analysis and the results enrich the theory of Differential Geometry This volume focuses on the most recent developments in this interaction including links with other fields such as Algebraic Geometry and Theoretical Physics Written by participants in the Symposium this volume treats various aspects of CR geometry and the Bergman kernel projection together with other major subjects in modern Complex Analysis We hope that this volume will serve as a resource for all who are interested in the new trends in this area We would like to express our gratitude to the Taniguchi Foundation for generous financial support and hospitality We would also like to thank Professor Kiyosi Ito who coordinated the organization of the symposium
