Teaching With Multiple Intelligence:

Teaching and Learning Through Multiple Intelligences Linda Campbell, Bruce Campbell, Dee Dickinson, 2004 Teaching and Learning Through Multiple Intelligences is an outstanding resource that offers expert analysis of Gardner's Theory of Multiple Intelligences and the knowledge to extend this theory to effective classroom practice. Broad based and comprehensive, this text describes implications for pedagogy, team teaching, student strengths, curriculum, assessment, community involvement, and diverse classroom models. The authors devote one chapter to each of the eight intelligences. They define intelligence, provide a checklist for identifying it, suggest environmental considerations, and offer related teaching strategies. Additional chapters survey Gardner's recent work on teaching for understanding, performance based assessment, and model MI school programs and student outcomes.

Multiple Intelligences in the Elementary Classroom Susan Baum, Julie Viens, Barbara Slatin, 2005-08-26 This book will help teachers design effective curriculum for their students with diverse learning abilities. The authors have created a guided process to apply MI theory to the elementary school classroom. The five pathways or approaches examined: Exploration, Bridging, Understanding, Authentic Problems, and Talent Development represent the ways in which MI can be implemented and nurtured across the elementary grades. The Pathways Model promotes and supports the development of a well grounded understanding of MI theory to inform goal setting and planning for using multiple intelligences theory in the classroom. Each pathway addresses a different set of goals and provides appropriate guidelines and examples.

Teaching for Multiple Intelligences David G. Lazear, 1992 Over the past 50 years, brain researchers have stated that human beings probably use less than 1 percent of the brain's potential, and research findings about human intelligence have transformed almost all previous definitions of intelligence. This booklet addresses the following key findings in intelligence research: intelligence is not fixed or static; intelligence can be learned and taught; and intelligence is a multidimensional phenomenon that occurs at multiple levels of the brain-mind-body system. After this discussion of the research, the publication is divided into five parts: 1. Overview of the Seven Intelligences: verbal-linguistic, logical-mathematical, visual-spatial, body-kinesthetic, musical-rhythmic, interpersonal, and intrapersonal intelligence. 2. Teaching for Multiple Intelligences: A New Look at the Curriculum includes an exercise on how one can teach for multiple intelligences in one's curriculum. 3. New Instructional Methods for Teaching with Multiple Intelligences. 4. Teaching about Multiple Intelligences: Re-inventing the Learning Process. and 5. A Multi-Modal Approach to Assessment includes techniques for student evaluation and teacher self-assessment. Contains 27 references. LL.
