Technical Talk:

Mathematics in Society and History S. Restivo, 2013-12-01 This is the first book by a sociologist devoted exclusively to a general sociology of mathematics. The author provides examples of different ways of thinking about mathematics sociologically. The survey of mathematical traditions covers ancient China, the Arabic-Islamic world, India, and Europe. Following the leads of classical social theorists such as Emile Durkheim, Restivo develops the idea that mathematical concepts and ideas are collective representations and that it is mathematical communities that create mathematics, not individual mathematicians. The implications of the sociology of mathematics and especially of pure mathematics for a sociology of mind are also explored. In general, the author's objective is to explore, conjecture, suggest, and stimulate in order to introduce the sociological perspective on mathematics and to broaden and deepen the still narrow, shallow path that today carries the sociology of mathematics. This book will interest specialists in the philosophy, history, and sociology of mathematics; persons interested in mathematics education; students of science and society; and people interested in current developments in the social and cultural analysis of science and mathematics.

Technical Writing and Professional Communication Baaladitya Mishra, 2025-01-03 Technical Writing and Professional Communication is divided into two parts: Technical Communication and Professional Communication. This comprehensive guide covers essential chapters on technical communication followed by the most important aspects of professional communication. We all know that communication is an integral part of our lives, whether via text or speaking, to convey our thoughts and feelings to others. Different communication skills are needed for various situations. For example, we use informal communication with family and friends, but for job interviews, business meetings, or interactions with teachers, formal communication is necessary. Communicating formally is a crucial skill, and mastering technical and professional communication is essential. This book provides the knowledge and tools needed to excel in both areas, making it an invaluable resource for anyone looking to improve their communication skills.

The Age of the Social Sal Restivo, 2018-06-12 The concept of society sui generis, society as a level of reality which could be studied scientifically, crystallized in the middle of the nineteenth century in Europe with the work of Durkheim, Marx, and Weber, and today more than at any other period in history, the idea of the social has gained a foothold in philosophy, biology, and neuroscience. However, this idea has emerged into prominence not through the historical or contemporary efforts of sociologists but mainly through the efforts of biologists and neuroscientists. This book seeks to re-establish the credentials of sociology as the science of society. While acknowledging the amalgamation of traditional disciplines into interdisciplinary and multidisciplinary networks of research and theory, and championing interdisciplinarity in recognizing the capacity of converging perspectives to yield more interesting general theories of social life, the author defends disciplinaryity in maintaining sociology's achievements as a discipline. With chapters on the sociological world view, imagining society, the self, love, education, mathematics, and religion, The Age of the Social re-states the importance of sociology as the source of robust

ideas about the social in an age in which this notion has grown in importance As such it will appeal to scholars across the social sciences with interests in method and philosophy in the social disciplines *Productivity Measurement in R & D* John T. Hall, Roger A. Dixon, 1975 This report describes an experiment in productivity measurement conducted at the National Bureau of Standards The experiment concludes that no matter how sophisticated the analysis and synthesis processes become statistical counts of output media e g publications citations invited talks will not serve as reliable measures of R D productivity The conduct of the experiment included a work sampling study a communications study an output analysis a value analysis approach to developing criteria for selection and evaluation of programs construct of a rating system for evaluation of programs and construction of a model of the R D process The ACE of Soft Skills: Attitude, Communication and Etiquette for Success Gopalaswamy, Mahadevan, 2010 The ACE of Soft Skills Attitude Communication and Etiquette for Success is a part of this educational process that produces top notch professionals Divided into three parts Attitude Communication and Etiquette this unique book provides a broa

Engineering and Contracting, 1908 **Sociology, Science, and the End of Philosophy** Sal Restivo, 2017-07-06 This book offers a unique analysis of how ideas about science and technology in the public and scientific imaginations in particular about maths logic the gene the brain god and robots perpetuate the false reality that values and politics are separate from scientific knowledge and its applications These ideas are reinforced by cultural myths about free will and individualism Restivo makes a compelling case for a synchronistic approach in the study of these notoriously hard cases arguing that their significance reaches far beyond the realms of science and technology and that their sociological and political ramifications are of paramount importance in our global society This innovative work deals with perennial problems in the social sciences philosophy and the history of science and religion and will be of special interest to professionals in these fields as well as scholars of science and technology studies **Sales and Advertising** Chester A. Gauss, 1922 **Energy Conservation Program Guide for Industry and Commerce (EPIC)** Robert R. Gatts, 1974 **Engineering Society of Detroit v.
