## Technical Comm:

Women in Technical Communication Sharon Burton, 2026-03-30 For the first time the stories of the women who built the profession of technical communication have been brought together. These women helped shape how the world understands technology. Spanning fifty years of innovation from typewriters to personal computers to smartphones, these first-hand stories reveal how women in technical communication carved out careers, led change, and defined a field in constant motion. Told in their own words, this anthology celebrates the pioneers who turned communication into a bridge between people and technology.

**Soft Law and the Global Financial System** Chris Brummer, 2012

The global financial crisis of 2008 has given way to a proliferation of international agreements aimed at strengthening the prudential oversight and supervision of financial market participants. Yet how these rules operate is not well understood. Because international financial rules are expressed through informal, non-binding accords, scholars tend to view them as either weak treaty substitutes or by-products of national power. Rarely, if ever, are they cast as independent variables that can inform the behavior of regulators and market participants alike. This book explains how international financial law works and presents an alternative theory for understanding its purpose, operation, and limitations. Drawing on a close institutional analysis of the post-crisis financial architecture, it argues that international financial law is often bolstered by a range of reputational, market, and institutional mechanisms that make it more coercive than classical theories of international law predict. As such, it is a powerful, though at times imperfect, tool of financial diplomacy and poses novel opportunities and challenges for the evolving global economic order.
