The World Food Problem:

The World Food Problem Phillips Foster, 1992

The World Food Problem Howard D. Leathers, Phillips Foster, 2017

The fifth edition of *The World Food Problem* reflects nearly a decade of new research on the causes and potential solutions to the problems of producing and distributing food in developing countries. With extensively updated data and new case studies throughout, this edition includes new or expanded discussions of such issues as genetically modified food, the impact of climate change, the quality of agricultural land and water, the significance of globalization, implications of changes in demographic policy such as the reversal of China's one child rule. The result is an accessible, comprehensive text as well as a provocative assessment of prospects for the future.

The World Food Problem Howard D. Leathers, Phillips Foster, 2009

Why do millions of people in the less developed countries go hungry while there is an abundance of food in the world? What can be done about it? These are the issues explored in this accessible and comprehensive text. In addition to incorporating updated data throughout, this new edition includes a comprehensive description and analysis of the 2008 food crisis, an expanded discussion of the impact of using food crops to produce biofuels, new case studies, and recent examples to illustrate key points, examples of successful and unsuccessful policy approaches, and reference to the latest research findings with more than 150 new citations. The result is the best available analysis of the current world food problem as well as a provocative assessment of prospects for the future.

World Food Problem Professor Miloslav

Rehcgil, 2018-01-10. The aim of this publication is to provide the interested reader with an authoritative and comprehensive up-to-date bibliography on all important facets of the world food problem, encompassing such questions as the availability of natural resources, the present and future sources of energy, environmental quality, population growth, world malnutrition, the state of food production, food consumption patterns, future food needs, toxicological aspects of food, agricultural and industrial aspects of food production, and family planning. It is the first compilation of its kind in that it covers the subject from a multidisciplinary point of view, including publications that deal with the description and analysis of the world food problem as well as those that offer alternative strategies and specific technological measures for alleviating the problem.
