*Animal Social Networks* Jens Krause, Richard James, Daniel Franks, Darren Croft, 2014-12-18 The scientific study of networks computer social and biological has received an enormous amount of interest in recent years However the network approach has been applied to the field of animal behaviour relatively late compared to many other biological disciplines Understanding social network structure is of great importance for biologists since the structural characteristics of any network will affect its constituent members and influence a range of diverse behaviours These include finding and choosing a sexual partner developing and maintaining cooperative relationships and engaging in foraging and anti predator behavior This novel text provides an overview of the insights that network analysis has provided into major biological processes and how it has enhanced our understanding of the social organisation of several important taxonomic groups It brings together researchers from a wide range of disciplines with the aim of providing both an overview of the power of the network approach for understanding patterns and process in animal populations as well as outlining how current methodological constraints and challenges can be overcome *Animal Social Networks* is principally aimed at graduate level students and researchers in the fields of ecology zoology animal behaviour and evolutionary biology but will also be of interest to social scientists

**Computer Networks and the Internet** Gerry Howser, 2019-12-23 The goal of this textbook is to provide enough background into the inner workings of the Internet to allow a novice to understand how the various protocols on the Internet work together to accomplish simple tasks such as a search By building an Internet with all the various services a person uses every day one will gain an appreciation not only of the work that goes on unseen but also of the choices made by designers to make life easier for the user Each chapter consists of background information on a specific topic or Internet service and where appropriate a final section on how to configure a Raspberry Pi to provide that service While mainly meant as an undergraduate textbook for a course on networking or Internet protocols and services it can also be used by anyone interested in the Internet as a step by step guide to building one s own Intranet or as a reference guide as to how things work on the global Internet

**Design, Measurement and Management of Large-Scale IP Networks** Antonio Nucci, Konstantina Papagiannaki, 2009 Sets out the design and management principles of large scale IP networks by weaving together theory and practice

**Serverless Network File Systems** Michael Donald Dahlin, 1995 Abstract This thesis presents the design of a serverless network file system a file system that distributes its functionality among cooperating networked machines to eliminate the central file server bottleneck found in current network file systems In a serverless system any machine can cache store or control any block of data This location independence provides better performance and scalability than traditional file system architectures Further because any machine in the system can assume the responsibilities of a failed component the serverless design can also provide higher availability This dissertation details the design of three serverless subsystems each of which distributes a specific piece of functionality that a traditional system

would implement as part of a central server I describe and evaluate cooperative caching a way to coordinate client caches to replace the central server's cache I evaluate different distributed disk storage architectures and present several improvements on previous log structured redundant storage systems Finally I present the design of a distributed management architecture that splits the control of the file system among managers while maintaining a seamless single system image Together these pieces form a serverless file system that eliminates central bottlenecks I describe the integration of these components in the context of xFS a prototype serverless file system implementation Initial performance measurements illustrate the promise of the serverless approach for providing scalable file systems
