Ninety percent of businesses still fail to execute their strategies because their leaders do not understand how to break each strategy down into groups of activities and sequences of events that drive the company steadily toward its desired goal. Beyond that, managers often fail to prioritize these activities, assign responsibility for them, and decide on measures of their success. Product Lifecycle Management (PLM) is the newest wave in productivity. This revolutionary approach is an outcome of lean thinking; however, PLM eliminates waste and increases efficiency across all aspects of a product's life from design to deployment, not just in its manufacture. By using people, product, information, processes, and technology to reduce wasted time, energy, and material across an organization and into the supply chain, PLM drives the next generation of lean thinking. Now PLM pioneer Michael Grieves offers everyone from Six Sigma and lean practitioners to supply chain managers, product developers, and consultants a proven framework for adopting this information-driven approach. *Product Lifecycle Management* shows you how to greatly enhance your firm's productivity by integrating the efforts of your entire organization. Most companies are seeing the returns of their efforts in lean methods diminishing as the most fruitful applications have already been addressed. Here, Grieves reveals how PLM gives you an opportunity to make improvements both within and across functional areas in order to increase agility, optimize efficiency, and reduce costs across the board. He gives you the most comprehensive view of PLM available, fully outlining its characteristics, methods, and tools, and helping you assess your organizational readiness. There are also proven examples from the field where PLM is being widely adopted by leading companies, including General Motors, General Electric, and Dell, that are widely adopting the approach. You'll see how PLM has saved these companies billions in unnecessary costs and shaved as much as 60% off cycle times. With this
