Soviet Fighters:

Soviet Fighters Doug Richardson, 1989-09 [Soviet Fighters of the Second World War](#) Jason Nicholas Moore, 2021-07-30
The Red Air Force had just started to re equip with modern monoplane fighters when the Germans opened Operation Barbarossa the invasion of the Soviet Union Hundreds of fighters were destroyed in the first few days but many of these were obsolete biplanes Soviet Fighters of the Second World War details fighter development from the dark days of Barbarossa to eventual triumph over Berlin Starting with outdated aircraft such as the Polikarpov Po 2 biplane and monoplane fighters the Soviets then settled on two main lines of development the inline engine LaGG 3 and its radial engine derivatives the La 5 and La 7 and the inline engine Yakovlev fighters which were produced in greater numbers than any other series of fighters Not only are these aircraft accurately described but experimental fighters are also dealt with In addition colour profiles illustrate these aircraft in terms of design camouflage and markings From the I 15bis biplane of the late 1930s to the superb La 7 and Yak 3 fighters of the last year of the war all Red Air Force fighters are covered in this comprehensive volume *Soviet Russia Pictorial* , 1924 *Soviet Cold War Fighters* Alexander Mladenov, 2017-04-20 Beautifully illustrated with many rare and unpublished photographs Soviet Cold War Fighters looks at the main development periods of Soviet fighter designs and covers all the important features and developments for each a total of four generations of fighter were developed from the late 1940s to the early 1980s that witnessed the most iconic and powerful fighters such as the legendary MiG 15 MiG 21 Tu 128 Su 9 MiG 23 MiG 25 reach for the skies followed by the modern day MiG 29 MiG 31 and Su 27 which strike fear in the West for their phenomenal weaponry and blistering performance All aircraft are described in detail with facts and figures including their weapons and instances of combat employment as well as explaining how the Cold War drastically changed Soviet fighter design to counter the West Researched and written by Alexander Mladenov a leading aviation journalist this is a highly detailed testament to leading Soviet fighter design and development *Soviet Aircraft and Aviation, 1917-1941* Lennart Andersson, 1994 This popular and highly acclaimed series includes an abundance of photos accurate line drawings fascinating evaluations of aircraft design and complete histories of aircraft manufacturers [The Department of State Bulletin](#) , 1957 The official monthly record of United States foreign policy **The Soviet Air Force Since 1918** Alexander Boyd, 1977 **FDR and the Soviet Union** Mary E. Glantz, 2005 Throughout his presidency Franklin Roosevelt was determined to pursue a peaceful accommodation with an increasingly powerful Soviet Union an inclination reinforced by the onset of world war Roosevelt knew that defeating the Axis powers would require major contributions by the Soviets and their Red Army and so despite his misgivings about Stalin s expansionist motives he pushed for friendlier relations Yet almost from the moment he was inaugurated lower level officials challenged FDR s ability to carry out this policy Mary Glantz analyzes tensions shaping the policy stance of the United States toward the Soviet Union before during and immediately after World War II Focusing on the conflicts between a president who sought close relations between the two nations and the diplomatic

and military officers who opposed them she shows how these career officers were able to resist and shape presidential policy and how their critical views helped shape the parameters of the subsequent Cold War Venturing into the largely uncharted waters of bureaucratic politics Glantz examines overlooked aspects of wartime relations between Washington and Moscow to highlight the roles played by U S personnel in the U S S R in formulating and implementing policies governing the American Soviet relationship She takes readers into the American embassy in Moscow to show how individuals like Ambassadors Joseph Davies Lawrence Steinhardt and Averell Harriman and U S military attaches like Joseph Michela influenced policy and reveals how private resistance sometimes turned into public dispute She also presents new material on the controversial military attach lend lease director Phillip Faymonville a largely neglected officer who understood the Soviet system and supported Roosevelt s policy Deftly combining military with diplomatic history Glantz traces these philosophical and policy battles to show how difficult it was for even a highly popular president like Roosevelt to overcome such entrenched and determined opposition Although he reorganized federal offices and appointed ambassadors who shared his views in the end he was unable to outlast his bureaucratic opponents or change their minds With his death anti Soviet factions rushed into the policymaking vacuum to become the primary architects of Truman s Cold War containment policy A case study in foreign relations high level policymaking and civil military relations FDR and the Soviet Union enlarges our understanding of the ideologies and events that set the stage for the Cold War It adds a new dimension to our understanding of Soviet American relations as it sheds new light on the surprising power of those in low places

The Russian Way of War Richard W. Harrison,2001 In this first comprehensive treatment of the subject Richard Harrison shows how this theory emerged and developed to become despite radically different political settings and levels of technology essential to the Red Army s victory over Germany in World War II

Red Spies in America Katherine Amelia Siobhan Sibley,2004 The most detailed study of Soviet military industrial espionage during the 1930s 1940s and 1950s spying aimed specifically at acquiring restricted information and materials relating to American industry technology and science

In Deadly Combat Gottlob Herbert Bidermann,2000 This book offers a ground soldier s perspective on life and death on the front lines providing details of day to day operations and German army life Wounded five times and awarded numerous

decorations Bidermann fought in the Crimea and the siege of Sebastopol participated in the battles in the forests to the south of Leningrad and found himself in the Courland Pocket at the end of the war He shares his impressions of Russian POWs of peasants struggling to survive the war and of his fellow German soldiers He also recounts the humiliation of surrender and offers a sober glimpse of life in a Soviet gulag Annotation copyrighted by Book News Inc Portland OR *Blitzkrieg to Desert Storm* Robert Michael Citino,2004 When Germany launched its blitzkrieg invasion of France in 1940 it forever changed the way the world waged war Although the Wehrmacht ultimately succumbed to superior Allied firepower in a two front war its stunning operational achievement left a lasting impression on military commanders throughout the world even if their own operations were rarely executed as effectively Robert Citino analyzes military campaigns from the second half of the twentieth century to further demonstrate the difficulty of achieving decisive results at the operational level Offering detailed operational analyses of actual campaigns Citino describes how UN forces in Korea enjoyed technological and air superiority but found the enemy unbeatable provides analyses of Israeli operational victories in successive wars until the Arab states finally grasped the realities of operational level warfare in 1973 and tells how the Vietnam debacle continued to shape U S doctrine in surprising ways Looking beyond major power conflicts he also reveals the lessons of India s blitzkrieg like drive into Pakistan in 1971 and of the senseless bloodletting of the Iran Iraq War Citino especially considers the evolution of U S doctrine and assesses the success of Desert Storm in dismantling an entrenched defending force with virtually no friendly casualties He also provides one of the first scholarly analyses of Operation Iraqi Freedom showing that its plan was curiously divorced from the realities of military history grounded instead on nebulous theories about expected enemy behavior Throughout Citino points to the importance of mobility especially mobilized armor in modern operational warfare and assesses the respective roles of firepower training doctrine and command and control mechanisms Brimming with new insights Citino s study shows why technical superiority is no guarantee of victory and why a thorough grounding in the history of past campaigns is essential to anyone who wishes to understand modern warfare *Blitzkrieg to Desert Storm* provides that grounding as it addresses the future of operational level warfare in the post 9 11 era **American Airpower Strategy in Korea, 1950-1953** Conrad C. Crane,2000 The Korean War was the first armed engagement for the newly formed U S Air Force but far from the type of conflict it expected or wanted to fight As the first air war of the nuclear age it posed a major challenge to the service to define and successfully carry out its mission by stretching the constraints of limited war while avoiding the excesses of total war Conrad Crane analyzes both the successes and failures of the air force in Korea offering a balanced treatment of how the air war in Korea actually unfolded He examines the Air Force s contention that it could play a decisive role in a non nuclear regional war but shows that the fledgling service was held to unrealistically high expectations based on airpower s performance in World War II despite being constrained by the limited nature of the Korean conflict Crane exposes the tensions and rivalries between services showing that emphasis on strategic bombing came at the

expense of air support for ground troops and he tells how interactions between army and air force generals shaped the air force's mission and strategy. He also addresses misunderstandings about plans to use nuclear biological and chemical weapons in the war and includes new information from pilot correspondence about the informal policy of hot pursuit over the Yalu that existed at the end of the war. The book considers not only the actual air effort in Korea but also its ramifications. The air force doubled in size during the war and used that growth to secure its position in the defense establishment but it wagered its future on its ability to deliver nuclear weapons in a high intensity conflict a position that left it unprepared to fight the next limited war in Vietnam. As America observes the fiftieth anniversary of its initial engagement in Korea Crane's book is an important reminder of the lessons learned there. And as airpower continues to be a cornerstone of American defense this examination of its uses in Korea provides new insights about the air force's capabilities and limitations.

Soviet Air Force Fighter Colours 1941-1945 Erik Pilawskii, 2003 This book represents probably the most detailed study published in the English language of the camouflage and markings of the fighter aircraft of the Soviet Air Force during World War II. Erik Pilawskii is a scholar of the Soviet Air Force in World War II and has undertaken several years of research to produce this ground breaking book. With information drawn from previously inaccessible Soviet archives the author first presents a detailed analysis of the developments trends patterns and irregularities of the color systems seen on Russian fighters and offers a fascinating insight into the workings of the Soviet manufacturing system responsible for this task. He then brings readers a technical study of each of the main fighter aircraft and variants and each description is followed by coverage of camouflage and markings factory applied field variations and seasonal. The text is supported by hundreds of rare and previously unpublished photographs and more than 40 commissioned full color artworks. Furthermore hundreds of color illustrations portray the immense variety of patterns related to this fascinating subject. This book will be a must have for all students of Soviet air power and Russian aircraft modelers. Brassey's Naval Annual Earl Thomas Allnutt Brassey, 1950
