Soviet Secret Projects:

Soviet Secret Projects Tony Buttler, Yefim Gordon, 2004 Among the best selling aviation titles of recent years have been Midland's Lutwaffe and British Secret Projects series Soviet secret projects now come under the spotlight This first volume covers bomber concepts from the various design bureaus from the 1940s onwards Many unusual and sophisticated aircraft are featured in these pages allowing comparisons between what the Soviets were working on and what was being produced in the West during that period

Soviet Secret Projects Tony Buttler, Yefim Gordon, 2005 This is the latest among Midland's very successful Secret Projects series This the second of three volumes covering Soviet secret aviation projects is devoted to post World War II fighters and will include designs from famous bureaus such as Lavochkin Mikoyan Sukhoi Yakovlev Myasishchev and Tupolev The book covers early post war fighters competitions for the first generation supersonic designs MiG 21 and Su 7 9 advanced designs of the 1960s which led to the MiG 2 and competitions to build the specifications which resulted in the MiG 29 Su 27 and MiG I 44 A number of previously unpublished Yakovlev designs from the late 1950s and early 1960s form a separate chapter followed by another covering Yakovlev's VSTOL work The book also describes the competition between design bureaus for orders and shows the progress made in aircraft design behind the Iron Curtain It will give both experts and enthusiasts the chance to compare this work to Western aircraft programs of the era

China's Stealth Fighter Abraham Abrams, 2025-01-02 A detailed exploration of China's J 20 stealth fighter its development impact and role in reshaping global power dynamics The United States and Soviet Union began a race to develop the first and most capable fifth generation stealth fighters in the late 1970s The Cold War's end however was followed by both a near total collapse of Russian efforts and major cuts and delays to American programs This provided an opening for a rising and fast modernising Chinese defense industry to kick off its own ambitious program to produce a world leading fighter jet with next generation capabilities Once unveiled the program came to be seen as a herald of China's rising status as a leading player in high tech and major world power Development of the Chengdu J 20 began in the 1990s and has since consistently far exceeded expectations in both its performance and its development timeline The fighter made its first flight in 2011 and began deliveries to the People's Liberation Army Air Force in 2016 a small fraction of the time its American and Russian rivals would take Today it is the world's second most numerous stealth fighter outnumbered only by America's much smaller Lockheed Martin F 35 Lightning II with the two rivals seeing their first of many likely encounters confirmed in March 2022 As the J 20's capabilities have rapidly improved and the rate of production has significantly grown it has very conspicuously played a growing role in patrolling major hotspots in East Asia from Korea and the East China Sea to the Taiwan Strait and disputed South China Sea The J 20 program's success has been the most potent symbol of China's ascent from a minor player in combat aviation during the Cold War to the United States only peer level competitor today It has also set China on a course of pursuing multiple other fighter development efforts including a close competition with America to field the first and

most capable sixth generation fighter in the 2030s The J 20 thus marks a major landmark not only in Chinese aviation history but also more broadly in the evolving balance of power between East and West as the country's technological and economic ascents allow it to successfully pursue highly ambitious weapons programs This book takes the J 20's story far back to the formation of the People's Liberation Army Air Force and its trial by fire in the Korean War tracing the rationale for developing a top end air superiority fighter It also compares its performance with rival fifth generation fighter programs in other countries and looks ahead to what the future may hold in this new arms race

[Rescuing People in Biochemical Attack Zones](#) Edenilson Brandl, This book was written with the goal of providing an in depth understanding of biochemical attacks and best practices for responding to these threats In a world where global security is constantly being challenged it is essential that professionals in the fields of rescue emergency response and healthcare are prepared to handle the most complex contamination scenarios Biological and chemical threats represent a growing risk and this manual aims to provide the tools knowledge and protocols necessary to meet such challenges Our focus here is above all on preparedness The rescue process in a contaminated environment requires not only adequate equipment but also a deep understanding of the situations and the impacts of the substances involved Throughout this book we will explore the most common types of chemical and biological agents their characteristics and the appropriate procedures for detecting identifying isolating and treating victims of such attacks Through a practical and scientific approach this book aims to be a reliable source for those working on the front lines in high risk situations Prevention and preparedness are the greatest weapons we have to minimize the damage caused by biochemical attacks The knowledge shared here can save lives and improve responses to future emergencies of this nature

[BattleSpace of Mind](#) Michael Joseph McCarron, 2024-02-29 The Nazi's never surrendered and planned their 4th Reich using neurocognitive weapons Going underground their technology made it's way to S America the Soviet Union the United States among other places We all are bound by the new rules of corporate fascism long planned by Himmler and his main strategy for a 4th Reich financial control Are we all just living in a computer controlled information battlespace continued from World War II This book dissects the matrix of control used by advanced military industrial powers it breaks down the technology bit by bit so you have an understanding how technology is being used in a battle for your mind I address these issues from a veteran's insight as a former Signal Intelligence specialist and with some background in the Intelligence Community I bring forth countermeasures to this control showing you how you can safeguard your mind from these attacks Countermeasures that are not available anywhere in the commercial world yet without them you will be easy prey for these directed targeted pulse modulated attacks first used by the Nazis

Sleeper Agent Ann Hagedorn, 2021-07-20 This historical page turner of the highest order The Wall Street Journal tells the chilling little known story of an American born Soviet spy in the atom bomb project during World War II perfect for fans of The Americans and nominated for an Edgar Award for Best Fact Crime Born in Iowa schooled in science at Columbia University and as American as baseball George

Koval was the ultimate secret agent. Because he had security clearances to the Manhattan Project he was able to pass invaluable classified information that helped Soviet scientists produce an atomic bomb years earlier than US experts had expected. The FBI only identified him several years after he had returned to the Soviet Union and in 2007 Vladimir Putin posthumously awarded him Russia's highest civilian honor for his contribution to the Soviet atomic bomb program. As William J. Broad wrote in *The New York Times*, Koval was one of the most important spies of the twentieth century but because of his success he is also the least known. Sleeper Agent is his fascinating story, a real life thriller as gripping as any spy novel and worthy of John le Carre. *The New York Journal of Books Bulletin*, 1994

J-20 Mighty Dragon Abraham Abrams, 2024-12-31. The J-20 fifth generation stealth fighter program has epitomised China's rise from a laggard in combat aviation into a potential world leader. *J-20 Mighty Dragon: Asia's First Stealth Fighter in the Era of China's Military Rise* details the J-20's technologies, capabilities, production, timeline, design priorities, roles, evolution, and the formations and locations where it has been deployed, the ways other countries have responded to it, and how the last 30 years of China's industrial and technology sector's modernisation positioned the country to produce what may well now be the world's top air superiority fighter. The J-20 program is the most high profile indicator of a turning point in the balance of power between China and the United States and has produced by far the most capable fighter that America or its allies could face in a potential conflict. An assessment of the history of Chinese air superiority capabilities and how the Korean War in particular has influenced the country to place a very strong emphasis on the need to field a leading fighter for air to air combat thus provides an important deeper understanding of the program. Important context to understanding the J-20's significance and its current global standing is provided by brief assessments of the positions of the Russian and American fighter industries. The parallel development of supporting assets from aerial tankers to electronic warfare planes is also explored for a better understanding of the much transformed Chinese fleet which J-20s are being inducted into. The program is also shown to have had a particularly significant influence in the United States ranging from placing discourse on the F-35's modernisation and on sixth generation fighter development in an entirely new context to stimulating the formation of new counter stealth aggressor training units, development of new air to air missiles and the acquisition of E-7 flying radar aircraft among many other responses to the new challenge. *J-20 Mighty Dragon: Asia's First Stealth Fighter in the Era of China's Military Rise* is the first volume in the new *Technology War* series and is extensively illustrated with colour photographs throughout and specially commissioned colour artworks. *Flypast*, 2006

UFOs and Abductions David Michael Jacobs, 2000. Examining the nature of UFO evidence, the authors present a primer for scholars, skeptics, and others uneasy about investigating the field of UFOs. The volume also brings together three bestselling authors: David M. Jacobs, Budd Hopkins, and Pulitzer Prize winner John Mack, widely known for their writings on the controversial alien abduction phenomenon.
